KAGUMO TEACHERS' TRAINING COLLEGE MRS NJORA- 2023

HISTORICAL AND COMPARATIVE FOUNDATIONS OF EDUCATION.

Course learning outcomes

By the end of the course the teacher trainee should be able to:

a) Define the term Education and explain the importance of History of Education.
b) Explain the role played by the African traditional system of Education in Kenya
c) Discuss the role of missionaries in the development of Education in Kenya
d) Explain the involvement of colonial government in Education in Kenya
e) Outline the Historical development of Education in Kenya since independence
f) Discuss contemporary issues in Education
g) Explore the trends in the development of basic Education in Kenya since Independence.
h) Dicuss the impact of policy papers in the development of education since independence:sessional paper No.10 of 1965,Universal Primary education of 1974, FPE of 1979,FPE 2003,Sessional paper No 1 of 2005, Vision 2023, FPE 2008, and sessional Paper No. 1of 2019.
i) Outline the challenges facing FPE(free primary Education
j) Explore the contributions of legal provisions in education from 2002 to present.Tsc act 2012,Basic education act 2013, KNEC act 2012,KICD ACT 2013,Public health Act 2012, Childrens act 2022,Public procurement and disposal act 2022,Constitution of Kenya 2010,TVET act 2013,Persons with disabilities act 2003.
k) Explore the development of teacher education in Kenya .
l) Dicuss on determinants of Education systems
m) Describe education systems in Finland, USA,Singapore,Britain, Ghana, Senegal , South Africa and Egypt. In East Africa Rwanda,Tanzania,Uganda and Ethiopia. (curriculum,management,structure,financing,assessment,entry grade,teacher education and policies)
n) International systems of Education Montessori,Accelerated Christian Education (ACE) General certificate of Education (GCE)
o) Trends in Education - education for millenium development,education for all (EFA),education for sustainable development (ESD) NO4
p) Alternative modes of education -multi-grade,multishift,mobile schools, home schooling,e-learning,and exchange programmes.

Introduction to History of Education

Definition of Education:

How do you define the word education? We'll consider the one given for us below: The word 'education' is exclusively used for the development of human beings in the cognitive, affective, psycho motor and psycho- productive domains. There is a general agreement among educationists and educators that education involves a desirable change in human behaviour through the process of teaching and learning. This means that a human being who exhibits undesirable behaviors from the point of view of the acceptable societal norms cannot be adjudged as an educated person, despite the fact that he had passed through the four walls of an educational institution. The society, generally, expects a kind of change from an educated person. Education, as a process of initiating the child into cherished norms and skills, is designed and implemented by the more matured or the adult members of the society to effect the desirable changes in the younger ones, from one generation to the other.

It can also be the total process by which human abilities and behaviour is developed; or the organized and continuous instruction aimed at imparting knowledge,skills, attitudes and unde rstanding necessary for full participation in life.

Education is also seen as a social process through which a member of a Society achieves individual growth and development and social competence, carried out in selected and well-defined institutional settings.

From the ongoing discussion, therefore, education could be understood to mean the total development of the individual child, through acceptable methods and techniques, according to

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

his abilities and interests, as well as the needs of the society, to take his rightful place and contribute adequately to the advancement of his society (Amaele, 2003).

- Meaning of History of Education:

This is the study of past development of education systems, education theory and institutions within the general framework of political, social, economic, technological and cultural changes.

Note: There are many definitions of the above terms. There is no single definition of any of them that is universally accepted by all. You can also come up with definitions in your own words.

Importance of History of Education to teachers

1. To improve the quality of education and strengthen professional competence. Prepare teachers to explore and critically examine alternatives education theories, practice and cultures so as to objectively determine what is acceptable. The study of past educational experience has many lessons that can be used to improve present Educational theory and practice. History of education is rich in both failures and breakthroughs for us to run away from or copy respectively.
2. To draw comparison of different emotional ideas and to show the development of various educational theories and practices in historical context.
3. To cultivate the art of self -expression, communication inquiry objective thinking and ability to judge what is good or bad.
4. To expose the student teachers to other disciplines such as history, CRE, oral literature, social and psychology from which history of education borrows.
5. Familiarize ourselves with great teachers' educationalist.

Why should a teacher or teacher-to-be study history of education?

Forms of education

Education can generally be classified into three forms, namely: formal, informal and non-formal. By these various forms some people might be receiving education without knowing. But there are limits to what each form of education can do to the receiver. The type of society one finds oneself and the type of person one is, determines what form of education is most appropriate for one. It is also important to observe that so many people have passed through all the three forms of education without knowing. Is that true of you too? (this question is for the student)

1. formal
2. Non-formal
3. Informal

1. formal education:

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

This is the type of education which is received in the regular formal school setting, for instance, the primary, secondary and tertiary institutions. Formal education has well determined setting where well trained and equipped personnel (teachers) interact, on regular basis, with the learner(s) on planned educative processes. The curriculum, the learning environment, instructional materials, testing and evaluation, human resources and others are planned ahead of time to achieve specific objectives within the time frame. Everything is patterned from the entry point to the exit point. The books, the classroom, the pupils, teachers, curriculum, etc are selected and formalized.

Characteristics of formal education-

a) The ability to read and write is the means through which knowledge and skills are communicated to the learners.
b) It is conducted in an institution by professional trained teachers.
c) it has structured curriculum with well defined goals and objectives.
d) testing and measuring are key to determining promotion to the next class or level.
e) achievement is recognized through the awarding of the certificates.

2. Non –formal:

This form of education has some basic characteristics of formal education like planned programme of action, contact persons, programmed assignment or examination and others, but it is not formal. It is an organized form of education which is provided outside the formal educational system. it is seen to be related to concept of recurrent and life- long learning. It takes the form of:

Adult education, Continuing education, Farmers training, Educational extension service

Family planning, Literacy programmes.

Its main feature is to provide a relevant skill for the earning of wages or self employment.

Characteristics of non-formal education

a) Is less rigid compared to formal education
b) Activities are flexible and therefore adapted to different situation
c) The cost are relatively low
d) It is skill oriented; it serves the immediate needs for unemployment and increased productivity.
e) Performers of the learner may be assessed through marks/grades

f) Certificates to recognize achievement may or may not be awarded

g) it is content focused though not necessary time bound

h) it is aimed at meeting the interest and inspirations of specific groups

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

3. Informal education

It is a long life process that provides an individual with skills, attitudes, values and knowledge from daily experience and through social interaction. This process of education includes all other agencies of learning outside the formal learning system.

Agents of informal education: family, Religious body, The media, the state and peer group

They introduce the learner to the roles and behaviour that are acceptable in the society.

Characteristics of informal education

a) It is unstructured
b) learning takes place unconsciously
c) it is broad based
d) It is often aimed at imparting moral values
e) it takes place anywhere and at anytime

Traditional System of Education in Kenya (A.T.E)

Characteristics of African Traditional Education.

a) Wholistic and utilitarian –it was functional and stressed participation &application to meet societal needs.
b) Authoritarian-the young were expected to accept adult instruction and direction without any question.
c) universal –every child was entitled to access to education without any inhibitions
d) Ritual oriented –each terminal level of learning was marked by certain initiation rituals or ceremonies which were referred to a rite of passage.
e) Communalism-individuals were taught to work and live as members of the community.

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

f) Conservative-it was aimed at the preservation of culture
g) Informal knowledge was committed to memory and then passed on orally and through practical demonstrations
h) Promotion from one level to the next was automatic
i) All adults acted as teachers
j) Respect for authority was inculcated in individual
k) It led to development of intellectual skills and the power to integrate experiences through use of speech, poetry and songs

How African Traditional education was conducted: (Methods/Approaches)

1. The education of a new born baby was the responsibility of a mother
2. The child was provided with moral education and was made to conform to the modes, customs and standards of behaviour of the clan he/she was born into.
3. In childhood games were considered crucial for mental and physical development.
4. Girls helped in the kitchen, fetched water and firewood and took care of the younger siblings.
5. Oral literature e.g. riddles, proverbs, songs and narratives. These provided moral education and made learners to conform to the normal standards and concern.
6. Participatory observation-Girls worked with their mothers and helped in various ways where as boys worked with their fathers so as to know their responsibility.
7. Apprenticeship-a boy was introduced to knowledge and skills related to agriculture, herding, gathering and fencing. Girls were introduced to pottery &basket weaving
8. Methodology –children learnt through folk songs, stories, riddles, proverbs dances, ceremonies and festivals prohibitions, poems, practical activities and observation. All these contributed to the children intellectual, spiritual and moral development.

Girls were brought up as future house wives and mothers while boys were brought up as future fathers and leaders.

ISLAMIC EDUCATION (group assignment)

FOUNDATION OF FORMAL EDUCATION IN KENYA

Kenyans have had a long and rich history of education and training. Traditional education was integrated with the social, cultural, artistic, religious and recreational life. This type of education provided skills and knowledge, and was a socializing agent that transmitted cultural values from one generation to another.

However, Christian missionaries introduced Western education in Kenya, as we know it today, by the 19th century when the first mission school was established in 1846 at Rabai, near

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

Mombasa. The first missionaries were Portuguese Catholics. By 1557, they had established monasteries in Mombasa and Lamu. The second group included Lutherans sent through the Church Missionary Society (CMS). Among them were Johann Ludwig Krapf, Johann Rebman and Jacob Erhardt. Early missionary education in the country was linked to conversion of Africans to Christianity and little progress was made to establish formal schools in- land until the beginning of the 20th century when the colonial administration took over control of African education from the missionaries.

The Role of Missionaries in Education

Christian missionaries were a powerful force in establishment and development of formal western education in Kenya. They were the pioneers of western Education; the founders of formal western education. The first group can be traced through Portuguese. They were Catholic. They occupied the coast and spread evangelical work.

The second group started with John K.Krapft. He came to Kenya in 1844 from Ethiopia under church missionary society. He was joined by Johamm Rebman in 1848 and later by Joseph Erhardt in 1849. They established their stations at Rabai Christian missionaries. They were joined by Kenya Methodist church. The group from Uganda established their station at Kaimosi.

Contribution of Christian missionaries in the establishment and development of formal education in Kenya

1. They laid the foundation for formal education by building the schools, in this schools they taught the 3Rs (Reading, Writing and Arithmetic) and religious Education.
2. In response to the African higher demand for academic & higher education, they developed some boarding schools in the country e.g. Kabaa High School.
3. They developed the first curriculum for African education, laying greater emphasis on political subjects.
4. They started the first African teachers training college e.g. Thogoto, Kigali, Kaimosi
5. They acted as sponsors and managers of the schools they build by supervising and employing teachers.
6. They helped the government to produce textbooks eg Carey Francis wrote mathematics textbook, Erhardt produced the first relatively accurate map of east Africa, Jacob wrote Kiswahili, grammar book and dictionary.
7. After 1949, they prepared Africans for political leadership following the recommendation of the Becher report(preparations of Africans for leadership roles in Kenya)

Question: Christian missionaries were a powerful force in establishment and development of formal western education in Kenya; Discuss (the Contribution of Christian missionaries in establishment of formal Education in Kenya).

Africans' response to early Christian missionary Education

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

The initial reaction of Africans to the Europeans' was one of curiosity, although it later turned into hostility on realizing that the Europeans' intended to stay. Africans were opposed to this and refused to allow their children to attend schools .

Other reasons for these negative response were:

1. The existing racial segregation in education.
2. Parents wanted their children to continue contributing to family the labour and therefore, saw attending school as a waste of time.
3. Parents and clan leaders wanted their children to preserve their customs and traditions and feared that, in school, the children were likely to pressurized into giving up their traditions.
4. Africans youth feared going against the wishes of elders in the communities, who were believed to possess magical powers and who could curse them.
5. Africans' saw missionaries as agents of colonization and oppression
6. Children who boarded at mission schools were engaged more in manual work than in the class work. So some families preferred to send their dull or difficult children to schools so as to reduce loss of family income.
7. The Africans detested the type of education given to them. They considered it to be of low quality. They wanted academic education which would give them upward mobility like the Europeans.
8. The methodology used was alien and not interesting.
9. Missionaries were harsh and brutal in their management of schools.

Consequently, Africans communities showed dissatisfaction with the type of education provided by the missionaries and began to open up their own schools which offered academic education. These were independent schools and were known as LNC schools (Local Native Council).

COLONIAL GOVERNMENT INVOLVEMENT IN EDUCATION

The colonial government had no clear education policy for Africans. However, the colonial administration was in agreement with the missionaries to offer Christians teaching and education to Africans

It was suggested that Africans needed mass education at the village level conducted in the vernacular. This education included: religious and moral teaching and be related to the Africans environment. The colonialist feared that the education for Africans would cause discontent and dissatisfaction with the colonial administration.

The Europeans settlers wanted the type of education that would prepare Africans to work on their farms

The colonial government influenced African education in the following ways:

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

1. It introduced technical education in Africans schools. Colonialist saw Africans as better suited for industrial and agricultural education.

2. It adopted segregation in education following the recommendation of Fraser commission of 1909 while the education of Europeans and Asians was tailored to cater for their intellectual development and prepare them for leadership, Africans were provided with very basic education as they were seen to be incapable of enduring long academic exposure

3. It appointed special boards, committees and commissions to look into education issues

4. It provided policy guidelines and a framework within which missionaries education developed

5. It started secular schools and provided facilities in areas where missionaries had little influence. This was through the local native councils (LNC)with the aim of meeting African demands for education.

6. It set up the department of education and conducted quality assurance by inspecting and supervising schools. The disbursement of funds to school by the department of education was based on this assessment.

7. It established colleges for training teachers so as to improve the quality of education following the recommendations of the Phelps -strokes commission. One such college was established at kikuyu.

8. It provided employment opportunities for those who acquired education, thereby prompting more Africans to seek education.

9. In line with the recommendations of the Phelps strokes commission, the government opened the native industrial training depot (NITD)at Kabete to train African artisans who would eventually replace Indians

10. It expanded girl's schools on the basis of Phelps strokes report, thereby increasing access to education for the girl's child.

11. It provided the land on which education institutions were built. It also provided security for the missionaries to enable them conduct their activities.

Educational commissions and reports before independence

1. The Fraser commission of 1909

2. Phelps Stokes commission 1924

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

3 The Beecher report 1948

When discussing the Education commissions we look at: Terms of reference, structure of education (what were commissioned to do), findings, recommendations and the response of the government to the findings of the commission.

The Fraser Commission

Prof. Nelson Fraser of Bombay was commissioned by the government in 1909 to carry out survey on education in British East Africa protectorate and advice the government on what type of education to provide.

His recommendations were:

1. African education should include religious teaching and practical education

2. Industrial apprenticeship be provided through incentre or contacts

3. The government should assist mission schools

4. Mission societies should provide education facilities for Africans

5. The establishment of a department of education headed by director of education

6. Education should be provided on racial lines with African education being the lowest caliber, then Asian and European in that order.

7. There should be limited teaching of English for church work and evangelism.

The following were results of the recommendations of the Fraser commission:

1. The curriculum was to be approved by the government

2. Education based on racial lines persisted until Kenya gained independence

3. A department of education was established in 1911 and James Orr. was appointed as the first director of education.

4. The Colonial government grant in aid a system was established to help mission schools

5. By 1912, industrial training in basic skills such as carpentry, agriculture and typing had been started. Government schools at Kitui, Machakos and Voi were expanded.

6. A misunderstanding arose between Christian missionaries and the government as to who was best suited to undertake education for Africans.

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

7. The government ‘s effort to open schools was viewed with suspicion by the Christian missionaries as they did not approve of secular schools. This led to the education commission of 1919.

A department of education was set up with directors of education –James Orr, 1911

-there should be 3 branches of education –for Europeans, Asians & Africans

-academic type of education to be given to Arabs &Europeans

-for African children, emphasis was on industrial education.

-the government should give grants in aid to missionaries to assist in education enterprise

Question. Reasons why missionary education did not make major impact in the coast as it came in the inland

- Many Africans had been converted to the island through qur’anic and didn’t want to be converted into Christians
- Africans were not ready to forgo their own culture in favors of a new one
- Tropical diseases did not favor the Europeans
- The concern of the missionaries were to be rehabilitate the free slaves

The Phelps –Stokes (1924) Commission

The Phelps Strokes commission of 1924 was missionary inspired and financed commission that called for partnership between missions and government, and not separate development.

The Phelps strokes commission’s objectives were:

-To conduct a survey in East and Central Africa with the aim of looking into the education programmes and needs in each area

-To identify the local religious, economic, social and health needs and assess how far they were being met

-To assist in formulating plans designed to meet the educational needs for Africans

The recommendations of the Phelps –strokes commission were as follows:

1. The government should look into both quantitative and qualitative aspects of education for Africans
2. An advisory committee on native education with government , missionary and settler representatives be set up

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

3. There should be more cooperation between the government and missionaries
4. A uniform system of receiving grants in aid for all missions and government schools should be established
5. The government should expand teacher training
6. There should be expansion of agricultural and industrial education, and adaptation of education to local needs
7. There should expansion of girl's schools

8. The following should be established

- A college at kikuyu for higher education for Africans

-English to be used at the medium of instruction of upper classes

-The jeanns schools, now, Kenya institute of administration (KIA)be opened

-Education be related to the needs of the people and character building be given priority

-Education should continue to be offered along a racial line

The results of the recommendations of the Phelps Strokes commission were:

1 In 1924, the jeans schools was opened at Kabete graduates were assigned the work of supervising and training village school teachers.

- The jeans school contributed greatly in training teachers and preparing relevant teaching aids
- In 1939, the jeans school's programmers were suspended because the centre was used during second world war. It was reopened in 1948 as a farmer's center.

2 The government opened the NITO to train African artisans

3Central advisory committee on education were established to look into the activities of the school's area committees.

4 The curriculum was diversified .This led to improvement of African education

Question. Explain causes of independent schools move in Kenya

The Beecher Commission

The Beecher commission led by L.J Beecher was appointed on 18th march 1949 with the following objectives

-To review the scope, content and methods of African education

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

-To review the policy and system of financing African primary education by the government through local authorities

-To look into the possibility of coordinating salary scales for African teachers

-To look into the operations of the existent grants in aid system

-To fix and streamline the use of school fees charged.

The Beecher commission made 148 recommendations, those relevant to education were;

1.Responsibilty for primary and intermediate school to be placed under DEB.

2. Establishment of four regional boards to be responsible for municipalities primary and intermediate schools. Outside the native lands, all secondary schools and teachers training institutions for effective running of existing schools.

3. introduction of 4-4-4 system to replace 6-2-4 system of education .There would be four years of primary education, four years of intermediate education and four years of secondary education.

4. the importance of maintaining cooperation between government and voluntary agencies in the provision of education

5. Education should meet the needs of the predominantly rural society.

6. continuation of practical education for Africans .
7. unjustifiable promotion and retention of learners in any given lever after they had reached their education ceiling being scrapped
8. improvement of teaching profession and recruitment of overseas teacher trainers .
9. preparation of Africans for future leadership roles in Kenya by the government .
10. creation of a more positive approach towards industrial and agricultural orientation of the African curriculum.
11. Teachers from Makerere to be appointed as assistant headteachers in a few primary schools.
12. Appointment of board of governors (BOGS)to supervise the implementation of education policies in each school.

The results of the recommendations of the Beecher Education included:

1. Increased enrolment of Africans in schools because of the LNC and parental involvement in education .

2. More funds were set aside for higher education for Africans at Makerere College and Royal Technical College.

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

3. DEBS managed some schools on behalf of the government.

4.Increased drop-outs because of fee charges.

5.Education for Africans continued to be provided on racial lines and by missionaries.

6. A more positive approach towards industrial education and agriculture was provided

The africans opposed the Beecher education Report for the following reasons :

1.The report did not create chances for higher education for Africans.

2.The report was likely to increase the number of school drop outs .

3. The many examinations inherent in the system became obstacle for the educational advancement for Africans.

4.Emphasis on practical education was resented by Africans because it led to low occupational status.

5.Resourses to promote Africans education were limited.

6.It supported the existing racial segregation in education.

7.It shortened the primary education duration from six years to four years. Africans' wanted eight years of universal primary education (UPE)

8.They wanted government to take charge of Africans education.

9.The idea of having European teachers in TTC was seen as an attempt to remove Africans from teachers training institution.

Generally, Africans felt that the Beecher education committee recommendations would be to Europeanization rather than Africanization of African education.

Africans contribution to development and expansion of formal education

1.The Africans provided labour when building schools

2.The Africans aided in translation of language .

3. They established independent schools.

4.Africans acted as teachers.

5.Formed Kikuyu Independent School Association.

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

6.Allowed their children to attend schools.

Factors behind responses of Africans towards the changes in western education (after 1920-1945)

1.Incentives to the local leaders –The local leaders were persuaded to send their sons and subjects the mission schools for training. Thus many schools were established government commissioned plea of land.

2.Attractions and rewards to the youth –The youth who attended school were rewarded.

3.Schools attendance was seen as mean to escape settlers farm labour-with the establishment of British rule and creation of settlers oriented economy there was demand for formal labour for settlers. Students attending school were excused from all demand for labour.

4.School education was seen as a gateway to employment –The skills of reading and writing gained in school resulted in paid employment as clerks and store men in administration and large scale farms. This knowledge also opened ways to a new and respected status in the community.

5.Schools education was seen as a gateway to political leadership-Following the breakdown of tribal system and a chained economic system African community became interested in western education. School education was not only a means of economic improvement but also an effective gateway to political leadership. It was amongst the educated Africans that political leaders emerge and articulate their grievances of illiterate peasants and workers.

6.Formation of UNESCO1948-The government

7.Returnees of the second world war 1939-1945 had gained knowledge on importance academic type of education.

8.Development of independent schools and churches.

QUESTION: EXPLAIN THE CAUSES OF INDEPENDENT SCHOOL MOVEMENT IN KENYA

1.Africans were unhappy with the westernizing influence of missionaries .

2.Missionaries taught against African customs e.g. female circumcision and polygamy.

3.African perceived mission education as agents of colonialism.

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

4.They were formed to provide enough schools to many Africans who mainly live in rural.

5.It was a political reaction to the colonial oppression, exploitation and repression .

6.Formed to provide conducive atmosphere where African nationalism could flourish.

7.Africans were dissatisfied with how Europeans missionaries interpreted the scriptures.

8.The desire for leadership Africans were not allowed to became leaders in missionary schools and churches.

9.Africans detested the type of education given to them. They considered to be of low quality. They wanted academic education which could give them upward mobility.

10.In 1929 the church of Scotland decided to ban farming and Kikuyu Central Province began to boycott mission schools and demanded an end to monopoly on education held by the missionaries.

11.They found the methodology used in colonial and missionary schools alien, irrelevant and boring.

12.The Africans wanted to fight the existing segregation in education where Europeans and Arabs were given an upper hand in education and Africans were demeaned basics in preparation to work in industries and white settlers' farms.

EDUCATION TRENDS SINCE INDEPENDENCE

1. Status of education at independence

Curriculum structures

Access to education

Financing of education

Teachers Education

2. KANU Manifesto of 1963 in relation of education

3. Sessional paper .10 of 1965.

4. Education commissions and report and their impact on education .

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

- The Mackay report 1981
- The Kamunge report 1988
- Koech report (TIQET)1999
- Sessional report paper NO 1of 2005
- Sessional paper NO 14 of 2012

5.Development of teacher education in Kenya (training ,structure, financing, curriculum and certification)

6.Contemporary issues in education

- corruption
- gender issues
- Children rights
- I.C.T

1. **Status of Education at Independence (1963)**

At independence in Kenya the education system inherited from Europeans was discriminatory segregated system. The system favoured Europeans and Arabs, Asians to the Africans. It was geared towards production of clerical officers and craftsmen, but the country at that time needed officers to take managerial job that were left by the colonialist.

-The nation was in fragments and undeveloped and ravaged by disease, the poverty and ignorance at the time the colonial administrators were leaving the nation, the following problems /challenges faced education in Kenya (problems inherited in education)

1.Inequality -based on racial discrimination, sex and geographical area.

2.National disunity – There was a segregated system of education.

3.Inadequate schools/learning facilities –The school were so few to accommodate the Africans, a lot of children of school age were not going to school creating a small group of educational elites group.

4.Lack of qualified human resource –Africans received minimum education as they received from clerks and craftsmen.

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

Before independence the education was racially stratified distinction existed in recruitment, training and grading. Teachers were primary school leavers and junior secondary education for a few.

-At independence there was a critical lack of secondary school teachers forcing the government to rely on expertise.

5.Irrelevant curriculum interns of content, examination, system and structure.

6.Language policy problem.

7.Limited finances –inadequate finances set aside for building schools ,employing teachers .
8.Inadequate resources-teaching and learning resources.

At independence education was critical for national development and therefore the government had to address the issues of opportunity access and equity.

Since independence the government has addressed challenges facing education sector through commissions, committees and task process

2.KANU Manifesto of 1963 in relation to education

The ruling party KANU put education as a priority in its election manifesto in preceding independence.

It committed itself to;

1.Attain universal primary education.

2.Extend and improve education at secondary schools.

3.Ensure that graduates output conforms with national needs.

4.Incorporates more post graduates study and advise into the mechanism of development planning

5.Look into programmes to enlighten the community e.g. Adult literacy and adopt science and technology in order to remove many of the barriers to economic development

6.Attain universal primary education UPE (principal goal)

7.Prepare the youth in their role in nation building, expand education in O level and respond in recommendation of education.

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

-A commission was set up to look into education in the country and advise the government in the formulation of national goals and policies of education.

Sessional paper is a policy document by the government based on commission recommendation

Sessional paper NO.10 of 1965(African socialism)

-sessional paper NO.10of 1965 stressed the importance of African socialism a term used to describe a system of political and economic ideals that are positively African ,incorporating useful and compatible techniques from various sources

-African socialism was expected to satisfy three conditions:

i) Draw from the best African traditions

ii)Adapt to new and changing trends or circumstances.

iii)Non alignment to any particular country or group of countries.

Features of Africans socialism contained in sessional paper no.10 of 1965 ;

a) political democracy

In many Africans traditional settings, political democracy prevented any group of people from dominating others .

-A man was born politically free and equal. His voice and advise has respected and heard regardless of his economic status. Even where traditional leaders appeared to have greater wealth and so hold a lot of political influence over their tribe or clan, they existed traditional checks and balances against any possibility of abuse of power.

-An individual needed only to be a mature member to participate fully and equally in political affairs. To promote this ,the paper suggested that each person or groups of people in Kenya be permitted to take part in policy making processes of the state so that the interests of the minority are not ignored.

-African socialism is different from communism whereas African socialism is a belief in sharing economic resources in a traditional way , communism is an ideology that seeks to establish a classless ,stateless social organization based on common ownership of the means of production.

b) Mutual Social responsibility.

Is an extension of the spirit of African families to the nation as a whole .

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

The state has an obligation to ensure equal opportunities for all citizen to eliminate exploitation and discrimination and to provide essential social services such as education, medical care and social security.

c)Various forms of ownership

under colonialism, Kenyans had neither political equality nor economic opportunity and their property rights were not respected.

Under the African socialism state and private ownership were encouraged, but the government had to ensure that a few individuals did not become too rich at the expense of everyone else .

d)A rage of controls

various control measures were put in place to ensure that property was used for the mutual interest of society and its members.

e) Diffusion of ownership

This was meant to check the concentration of economic power in the hands of a few people.

f) progressive taxation

this was meant to ensure equitable distribution of wealth and income

The sessional paper also addressed:

Africanization of jobs in both the public & private sectors

Provision of skilled man power

Foreign exchange –earning and spending

Proper use of domestic resources

Naturalization of schools, hospitals, roads, water supply and major industries

The establishment of welfare services

Guidelines in relation to education

SESSIONAL PAPER NO 10 OF 1965 provided guidelines to shape education in orders to achieve the following:

1.To produce good citizens at the end of the seven year free education course.

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

2.To meet the needs of economic growth by producing the required manpower.

3.To promote national unity

4.To encourage proper use of leisure time.

5.To develop curriculum that would meet the government's specified standards .

6. To produce citizens who could contribute to the development of education through self-help activities e.g. payment of taxes, school fees.

Achievements of Sessional paper No. 10 of 1965

1.Education continues to impart knowledge, skills and attitudes that promote social and economic development.

2.Centralization of curriculum development at KIE (KICD) took place and through this, the government controls curriculum that is used in all public educational institutions below the university .

3.Citizen of Kenya continues to contribute tremendously to the development of education in various areas especially through the concept of cost sharing.

4.Education continues to promote national unity by for example ,teaching Kiswahili the national language ,as an examinable subject. This enables Kenyans to communicate with and understand one another.

Aims

Education should meet the need for economic growth by producing economic manpower.

KENYA EDUCATION COMMISSION – OMINDE REPORT

After independence in December 1963 ,the government appointed the Kenya education commission also referred to as Ominde Commission of 1964 with objectives that is to :

1,Survey existing educational resources in Kenya

2.Advise the government on the formulation and implementation of national policies for education.

3.Address problems inherited from the colonial government to make education more to the needs of the country.(main goal – Foster national unity and cohesiveness)

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

The following are recommendations that were adopted and implemented from the Ominde report:

-The introduction of the 7-4-2-3 system of education that is seven years in primary education four years secondary education ,two years pre-university education and three years university education

-Each secondary school to give the minimum of 20 percent of its vacancies to students from outside its area (unity)

-Education to foster positive aspects of culture and history such as communal sharing and cooperation.

-English to become the medium of instruction in all schools, Kiswahili, through non-examinable should be used in primary schools to act both as a unifying force and an effective means of communication.

-Efforts be made to ensure the trained and sufficiently skilled manpower tak eover the management of the country's affairs from the Europeans as they left the country's affairs.

-Teachers be posted to teach in any public institution regardless of race, creed ,tribe or social affiliations.

-Racial integration be put in place in education.

-All schools to use a common curriculum.

-Entry age of primary school be pegged at six years.

-Social training, science education ,training in manipulative skills and teaching good citizenship were to be given special emphasis in primary education.

-History and geography syllabuses be revised to reflect the Kenyan situation.

-Agriculture to be offered as part of general science in a revised syllabus and not as a separate subject.

-Art and craft be taught for motor control and coordination.

-Music be encouraged for its contribution to patriotism and national unity.

-Integration of the scattered teacher training institutions to improve quality.

-Kiswahili to be compulsory subject in secondary schools.

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

-Institutionalization of legal framework to address early childhood and special education.

-Guidance and counseling be established in all institutions of learning.

-Teachers to be well renumerated.

-Revision of the functions of the TSC

-An ideal pupil –teacher ratio of 40:1 be effected and ,where this was not possible, alternative approaches to teaching to be applied.

-Co-curricular activities be made an integral part of the entire basic education .

-Consolidation of laws dealing with education.

A STUDY OF CURRICULUM DEVELOPMENT IN KENYA – BESSY REPORT.

The report of 1972 looked into the problems of the curriculum caused by the neglect of practical and creative subjects.

Recommendations in the Bessy Report were as follows:

1.That the primary curriculum be broadened and intensified to produce adaptable individual capable of surviving in the society.

2.That a more rural oriented syllabus which include African folklore, social studies, science ,Agriculture ,home and community studies and crafts be introduced.

3. That the primary school curriculum be planned in three distinct but related phases lower primary(std 1-3)middle primary (std 4-5)and upper primary (std 6-7)classes.

4.That physical sciences be introduced in forms 5 and 6 to replace general science ,physics and chemistry.

Following the report, the existing subjects and syllabuses were reviewed under the guidance of the curriculum development centre.

-The Bessy report only addressed part of the curriculum reforms

UNIVERSAL PRIMARY EDUCATION OF 1974

.Therefore ,the Gachathi committees worked on bringing a change in the entire curriculum.

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

Question .Education objectives as recommended by **Gachathi report (1976).**

The national committee on educational objectives and policies –Gachathi report

THE NATIONAL COMMITTEE ON EDUCATION OBJECTIVES AND POLICIES ALSO KNOWN AS GACHATHI REPORT ON 1976

was entrusted with the task of redefining educational objectives and policies.

It has also required to formulate a specific programme of action for realizing the objectives and policies within the nation's financial constraints.

The recommendation made in Gachathi report were as follows

1.That free secondary education be attained by 1980

2 .That primary school education be increased from seven to nine years .The nine years of basic education was to be followed by two years of junior secondary and four years of senior secondary education.

(9-2-4 system of education)

3.That a new examination system and a new curriculum be introduced and considerable amount of teacher retraining be done.

4.That emphasis be placed on vocational, scientific and technical education &skills in the school curriculum.

5.That secondary school education be geared towards the rural and informal sector by diversifying the curriculum and teaching agricultural sciences .

6.That a language policy be addressed

Opted in which the teaching of mother language would be emphasized as the medium of instruction in the lower classes std 1to std 3,and Kiswahili be used in schools in urban settings due to their cosmopolitan nature.

7.The national centre of early childhood education (NACECE)be established to coordinate early childhood education matters at a national level and distinct centres for early childhood education(DICECE)be set up to coordinate early childhood education.

8.That the teaching of science be enhanced on through the building of more laboratories.

9.That Kiswahili as a language be made compulsory and examined at primary and secondary schools levels.

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

10.That a centre of research and study of Africa languages be established

11.That English be taught at all levels and an examinable subject

12.That Kenyatta university college be elevated to a fully fledged university.

13.That the education for teachers be improved and expanded.

14.That teachers be promoted on merit to administrative status while still teaching.

The government accepted the recommendations of the Gachathi committee and started the work of restructuring the education system.The recommendations made by Gachathi report were not implemented due to economic constraints.

FREE PRIMARY DECLARATION OF 1979

THE PRESIDENTIAL WORKING PARTY ON ESTABLISHMENT OF THE SECOND UNIVERSITY IN KENYA –MACKAY REPORT 1981

Working party is a group of professionals appointed by the president to investigate on something and later give a report of recommendations

The Mackay report of 1981 was chaired by Canadian educationist, professor Colins Mackay and technological university in the country.

The commission drew a lot from the recommendations of the international labour organization (ILO)mission and the Gachathi Report in making the following recommendations

- The setting up of a technically oriented university
- The establishment of a college for continuing education
- Adaptation of the 8-4-4 system of education .The primary education period extended from 7 years to 8 years and the A level component of education be scrapped reducing secondary education from six to 4 years .
- Improvement of curriculum content giving greater orientation towards vocational and technical education .
- Effort be made to reduce emphasis on examination –centre education

Achievements from Mackay Report

- Moi university was established in 1985 as the second university in Kenya

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

- Kenyatta university college and Egerton – a constituents colleges of the university of Nairobi became full-fledged universities bringing the number of public university to four.
- 8-4-4 was systematically introduced
- Home science, agriculture woodwork, art and craft ,and business education were introduced in the primary school curriculum.
- Continuous assessment was made an integral part of the overall assessment of learners contributing 30 out of the 100 marks required for the final examination .
- Project work was introduced in the technical and vocational subjects as part of the final certification of learners .

Other results of the Mackay Report that were outside its frame of reference include :

- Intensifying in service teachers training programmes
- Promotion of teachers on merits
- Additional primary TTCS were constructed to provide extra manpower for facilitation of the curriculum.
- External degree programmes were started at the university of Nairobi
- Social studies replaced Geography, History and civies in the primary school.

The presidential working party on education and manpower training for the next decade and beyond –Kamunge Report

When the presidential working party on education and manpower training for the next decade and beyond was appointed in 1988, Kenya was experiencing economic decline due to the impact of the structural adjustments programmes (SAPS)introduced by the international monetary fund(IMF)

The following are recommendations that were made by Kamunge Report

1. Cost sharing for in education for rationalization of government budget on education with the tight implementation of this recommendation, the enrolment at primary level declined from 95%in 1988 to 76.7%in 1997 as indicated in national development plan for 1997-2001.

2.The establishment of a national Advisory Council on education that would ,on a continuous basis,review all aspects of national education ,training policies and objectives and implementation of recommendation.

3.The establishment of a strong professional development institute. This led to the establishment of Kenya Education staff institute(KESI)

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

TOTALLY INTERGRATED QUALITY EDUCATION AND TRAINING (TIQET)-KOECH COMMISSION 1998

Dr.Dary Koech was appointed to chair the commission of inquiry into the education system of Kenya in 1999.The aim of the commission was to review Kenya's education system and recommend ways and means of enabling it to facilitate the following :

1.National unity.

2.Mutual social responsibility

3.Acceleration of industrial and technological development

4.The consideration and enhancement of lifelong learning and adaptation in response to changing circumstances.

The following were recommendations made in Koech Report

1. Diversification of curriculum to make it more relevant at each level of learning.

2.Make graduates more useful to the society

3.Reduce the workload in the curriculum by dividing the subjects into examinable and non examinable subjects.Make it more manageable to learners .

4.Expansion of basic education from eight to 12years –eight years of primary education and four years of secondary education.

5.Equity in education by provision of universal and compulsory basic education.

6.Expansion of opportunities at past secondary school level.

7.All providers of education be accountable to the ministry of Education(MOE)

8.Introduction of limitless opportunities for access to education through alternative and continuing education.

9.The medium of instruction in lower primary school be the learners mother tongue or the dominant language within the school catchment area.

-In urban centres this would be Kiswahili, English was to be used as the medium of the instruction in upper primary classes throughout the country..

10.The ministry is responsible for modalities of ensuring publication of instructional material in the local languages in the country.

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

The Koech report has been said to be the most comprehensive and forthright of all commissions since independence .

It saw the need of an education system that promote the all round development of an individual persons and which fosters national unity,moral integrity and and mutual social responsibility .

The national development plan (2005)indicates that the government did not adapt the report fully due to cost implications but some recommendations such as curriculum rationalization have been adapted and implemented

Others recommendations that have been implemented include:

1.Adoption of alternative approaches to teaching for example mobile schools in Wajir,and Samburu and multigrade and multi-shift schools in Garrisa and overpopulated urban informal settlement.

2.Contemporary issues have been integrated into curriculum.

3.**FPE was implemented in 2003** in an attempt to attain universal primary education (UPE).

4.Implement of quality of education by raising the entry requirements of TTC and reducing curriculum workload through subjects specialization.

5.Enhancing the management capacities of education managers through in-service training.

6.Opportunities for lifelong education have been enhanced through continuing education and parallel education programmes.

7.Provision of policy guidelines to streamline early childhood education,special needs education and gender mainstreaming .

8. Revision of the curriculum at all levels of education by the KIE to make it more relevant to societal needs.

SESSIONAL PAPER NO. 1 OF 2005 ON A POLICY FRAMEWORK FOR EDUCATION,TRAINING AND RESEARCH that was established by the government to adopt the goals of the Kenya education sector support programme (KESSP)from 2005 to 2010.

-The policy framework was formulated by the MOE as a result of findings of the national conference on education and training held in November 2003.

The conference addressed the following areas :

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

1.Management and planning of education and training.

2.human resource management

3. teachers development and utilization

4.Information,communication and technology.

5.Research and development.

6.Financing and partnership in education.

7.Legal framework.

According to sessional paper no 1 of 2005,the overall goal of education is to achieve education for all (EFA)by the year 2015.The MOE has set the following specific objectives in line with national and international goals.

1.To develop a comprehensive early childhood development and education (ECD)policy paying attention to gender, and vulnerable and disadvantaged children by the year 2015.

2.To ensure that all children girls, children in difficult circumstances and those from marginalized or vulnerable groups, have access to free and compulsory primary primary education by the year 2010.

3.To enhance access equity and quality to all levels of education and training by 2010.

4. To improve all aspects of education and training quality so that recognized and measurable learning outcomes are achieved, especially in literacy, numeracy and essential life skills relevant to the world of the work by the year 2010.

5.To ensure that the learning needs of all young people and adults are met through equitable access to appropriate learning and life skills programmes by the year 2015.

To promote information communication and technology (ICT)as well as science and technology education by the year 2008.

The govt launched free sec educ 2008, the paper addressed the plight of children from poor households who could not access FSE after completion of Pri. Educ due to sch fees

Sessional paper 1 of 2019 outlines the national agenda for gender equality and how Kenya intends to realise these ideals .

NDENGWA REPORT OF 1971

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

Although the commission concerned the whole of civil service it made specific recommendations on education that were to influence education.

Recommendations

1.Re establishment of DEBS to enable the primary schools system to respond effectively to local requirements by active participation and involvement of the local community.

2.The commission recommended phasing out of teachers without secondary education.

3.The commission recommended diversification of the curriculum to allow more secondary schools to provide technical and vocational subjects. This was to enable secondary education to meet the manpower needs of the country.

4.The government should take over all harambee schools and maintain them in order to improve the standards.

5.To correct the mismatch between technical and vocational education to meet the job market needs .

6.Reviewing the curriculum in liaison with commercial and industrial organization to offer relevant education.

7.Expansion of training of teachers especially in sciences. The commission also urged the government to improve teachers salaries to attract high caliberstudents to undertake education courses.

Question :What are the educational objectives recommended by Ndegwa commission of 1971

Question :National educational oibjectives recommended by Kamunge 1988.

DEVELOPMENT OF TEACHER EDUCATION IN KENYA

Financing of education

Since independence ,the government has continued to spend more on education a factor that may be attributed to the great demand for education and the change to educational policies that are expensive to implement following the introduction of FPE,the government of Kenya has increased its annual education budget.

The following are ways through which education is financed in Kenya.

1 Financing of primary schools is done through DEBS which prepare the budget for respective schools and and submit them to MOE.

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

2 The ministry of culture and social services once in a while provides financial and material assistance to schools particularly those hit by natural disasters such as storms and strong winds.

3.Social welfare association such as the Kenya charity sweepstake and NGOS give assistance to schools for construction of physical facilities and the general improvement of available facilities.

4.Foreign agencies that support education include united nations children funds (UNICEF)United nations educational scientific and cultural organization (UNESCO)Cooperative for assistance and relief everywhere(CARE)and plan international .They provides funds for technical assistance and material resources.

5.The government provides grants to secondary schools to meet some of the development and recurrent expenditure ie school fees.

6.The government with the assistance of development partners,finances in-service training and capacity building of educational managers through the Kenya education sector support and support(KESSP)which intended to:

-Facilitate the attainment of millennium development goals (MDG)and EFA.

-Enhance mobilization of resources to support the development of education sector.

-Enhance under wider participation,ownership and partnership in education.

7.Government bursaries are available for learners pursuing secondary and tertiary education .These are accessed through CDF.

8.Some secondary and tertiary education learners have benefited from scholarship offered by kind individuals,organizations and friendly countries to undertake their studies both locally and outside the country.

9.Public universities receive some funding from the government.

10.Local university students attending both public and private institutions are eligible for a loan from HELB.

The Curriculum

-Curriculum development in Kenya is centralized under the Kenya institute of curriculum of development (KICD)Which is the national centre for curriculum development and research.

The key role of KICD is to undertake research and develop and disseminate relevant curriculum and curriculum support materials for quality education.

-The KICD develops curriculums for all levels and categories of learning,except university education .

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

-The KICD has set up course and subject panels whose members are drawn from other institutions to deal with content and methods in the curriculum for schools and colleges under its jurisdiction. School, Zonal and district subject panels operational local level through Teacher Advisory Centre (TAC)tutors to articulate the needs of teachers and learners in local schools .

Curriculum in Kenya has gone through major phases :

i)The adoption phase-this was the curriculum in the period immediately after independence.It was characterized by imported syllabuses and textbooks and examination set and marked externally at Cambridge in the UK.

II)The adoption phase –This was the curriculum of the 1970sin which the attempt was made to adopt the curriculum to local conditions, Curriculum projects undertaken by the KIE during the period include school mathematics of East Africa (SMEA)which was adapted from the british school mathematics of East Africa and the school science projects (ssp)

iii)The indigenization phase-this is the curriculum of the 1980s to date in this phase,a lot of resources have been used to write the curriculum.

-Course objectives have been redefined and learning opportunities clearly spelt to make the curriculum relevant to the needs of the contemporary society in content approach and value.

Strengthening mathematics and science education (SMASSE-1998) GOK AND JIKA (Japan international cooperative agency (Centre for mathematics, science and technology education (CEMASTEA to offer services education in math's .

Structure of Education

The Kenya education system has evolved over time with major challenges having been instituted in the 1980s.

-In 1984, the 7-4-2-3structure and system was replaced with 8-4-4 system /structure which introduced a broad –based curriculum at all levels of education.

-Delegates at the national conference of Education and Training (2003) noted that both 7-4-2-3 and 8-4-4 structures provide 16 years of schooling.

The current structure of education and training in Kenya comprise 3 levels

i)Basic education

basic education is divided into two

Primary education which lasts 8 years and cater for 6-18year old. It leads to KCPE on the basis of marks obtained in KCPE, Learners could enter either secondary schools or youth polytechnics.

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

VISION 2030- TO TRANSFORM KENYA INTO A MIDDLE INCOME ECONOMY.

- Integrate ECDE into basic education curriculum with a view to improving its management , increasing access to ECDE and enhancing retention at lower primary school level.this would be done through community mobilisation ,capacity building , community grants ,promotion of ECDE health and provision of primary school readiness.
- The govt will provide learning materials,trained teachers and infrastructure.
- Basic education programme : govt to support the sector inalternative basic education programmes including non-formal education , madrassas and mobile schools, community sensitisation programmes.
- Provision of grants to non -formal sector which are not yet registered -208 NFS are registered.
- Free day sec schs (FDSE)to enhance equity, access and imrove transition from pri to secondary.
- Construct new sec schs
- Provision of bursaries to orphans and vulnerable groups.
- free tuition(2008)
- University education - increase enrolment from 3% to 15% by2015 new universities to be established , expand capacities of existing ones upgrade middle level colleges , fast track post graduate programmes in order to increase PhD holders this to be done by increasing govt funding to universities.
- Universities to form strong partnerships with other universities, industries and international organisations to boost relevance of univ educ.
- Curriculum review to ensure quality and relevance in education and training. KICD to revise the curriculum and develop support materials . capacity building , digitise the curriculum among others
- HIV/AIDS-to strenghthen the sectors capacity to provide HIV/AIDS prevention ,care , support and mitigation .This will be done thro' in-service training of staff in pri and sec schs.Integration of the same in subjects.

CHALLENGES FACING IMPLEMENTATION OF FREE PRIMARY EDU (FPE) IN KENYA

- Gender disparities,

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

- high poverty levels' drugs and substance abuse among youth.
- Teacher supply and quality
- HIV/AIDS pandemic and COVID 19
- Inadequate financial resources by govt-corruption
- Poor academic results
- Poor perception of parents , teachers and other stakeholders e.t.c.
-

SOLUTIONS

- Increase number of public schs
- Recruit more teachers
- Sensitise parents on importance of educ
- Improve security in bandit stricken areas
- No delay of the disbursement of funds of funds by the govt.
- In-service of teachers to improve quality of service
- Provision of more learning materials eg free pens, textbooks ,pencils, manilla paper, tablets etc

LEGAL PROVISIONS IN THE DEVELOPMENT OF EDUCATION IN KENYA

- **TSC ACT 2012**

1. Review the standards of education and training of persons entering the teaching profession.

2. Review the demand for and supply of teachers and advice the national government on matters relating to the teaching profession.

3. Formulate policies to achieve its mandate

4. Provide strategic direction ,leadership and oversight to the secretariat.

5. 5. Ensure that teachers comply to the teaching standards prescribed by TSC
