    D. By allowing access to pick date from calendar option
14. Which of the following data toe is more commonly called Boolean?
    A. True/false
    B. Date/time
    C. Attachment
    D. Hyperlink
15. Which linking code can be used to link a web page to kmtc.ac.ke?
    A. <link="kmtc.ac.ke">KMTC </A>
    B.
 "kmtc.ac.ke" >< KMTC< /A>
    C. <URL="kmtc.c.ke" >KMTC </A>
    D. <AHREF="kmtc.ac.ke"> KMTC </A>
16. Step by step instructions written to solve any problem is called
    A. Class
    B. Pseudo cords
    C. Algorithm
    D. Assembler
17. DHCP severs provides --- to the client?
    A. Fire walls
    B. Protocol
    C. Network address
    D. Linux
18. Which one of the following is a html tag
    A.
    B. ≤P≥
    C. ≤ahref/≥
    D. >br<
19. Which attribute in html language is used to embed an image in a HTML page?
    A. <photo>
    B. <scr>
    C. <img>
    D. <image>
20. What feature will one use to apply motion =effects in between a slide exits and another enters?
    A. Slide design
    B. Slide transition
    C. Slide design
    D. Animation scheme
21. Step by step instructions written to solve any problem is called
    A. Pseudocode
    B. Class
    C. Algorithm
    D. Animation scheme
22. A set of rules that govern all aspects of information communication is called
    A. IP address
    B. Network address
    C. MAC address
    D. Protocol

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

23. Computer memory is measured in terms of
    A. Bytes
    B. Bits
    C. Units
    D. Megabytes
24. What type of chart is useful I comparing values over categories?
    A. Pie chart
    B. Dot graph
    C. Column chart
    D. Line chart
25. A feature in Excel that displays on the data in column(s) according to specific criteria
    A. Filtering
    B. Sorting
    C. Formula
    D. Pivot
26. The greater than sign (>) is an example of --- operator
    A. Logical
    B. Arithmetic
    C. Greater
    D. Conditional
27. An Excel file is generally called a/an
    A. Sheet
    B. E-spread sheet
    C. Work book
    D. Worksheet
28. When a row of data is to be converted into columns
    a) Copy the cells in row, select the same number of cells in row and paste
    b) Copy the cells in column then choose paste special, then click transpose and ok
    c) Copy the cells then go to cell then on alignment tab click transpose check box and click ok
    d) Select the cells then place the cell pointer on new cell and choose paste special mark transpose check box and click ok
29. Which bar show the used formulas of selected active cells?
    A. Ribbon
    B. Formula bar
    C. Scroll bar
    D. Menu bar
30. _____ is the process of finding errors and fixing them within a program
    A. Debugging
    B. Executing
    C. Scanning
    D. Compiling
