KENYA MEDICAL TRAINING COLLEGE
FACULTY OF INFORMATION TECHNOLOGY AND MEDICAL EDUCATION
DEPARTMENT OF HEALTH RECORDS AND INFORMATION

YEAR ONE END OF SEMESTER 2 EXAMINATION FOR SEPTEMBER 2018 (UPGRADING) FOR DIPLOMA IN HEALTH RECORDS AND INFORMATION TECHNOLOGY

PAPER: EPIDEMIOLOGY

DATE: 25th July 2019	**TIME: 2 HOURS (9:00AM – 11:00 AM)**

55/70

INSTRUCTIONS

1. This paper consists of:
   - Section 1 (20 Multiple Choice Questions)
   - Section 2 (6 Short Answer Questions)
   - Section 3 (1 Long Answer Question)
2. Attempt **ALL** Questions
3. Write the **EXAMINATION NUMBER** given on all the answer sheets provided and on the question paper.
4. Ensure that all examination answer scripts are handed in at the end of the examination
5. Ensure you sign the examination register provided

EXAMINATION NUMBER .....

SECTION ONE: MULTIPLE CHOICE QUESTIONS (20 Marks)

1. Microbes were discovered by?
   a. John Snow
   b. Pasteur and Koch
   c. Hippocrates
   d. Edward Jenner
2. In the definition of epidemiology, determinants generally include
   a. Agents
   b. Control measures
   c. Risk factors
   d. Source
3. Which of the following is not part of the word epidemiology?
   a. Demos
   b. Logos
   c. Epi
   d. Demio
4. The search for causes and other factors that influence the occurrence of health-related events is?
   a. Pattern
   b. Distribution
   c. Determinants
   d. Epidemiology
5. When the occurrence of a disease is persistently higher than normal it's called
   a. Holo-endemic
   b. Hyperendemic
   c. Pandemic
   d. Endemic
6. The measure of the magnitude of disease or other health related events is called
   a. Counts
   b. Percentage
   c. Frequency
   d. Proportion
7. Which of the following is not true about proportion?
   a. Measures part of the population affected by disease compared to the total population
   b. Can be expressed per 100
   c. The time period may not be specified
   d. The denominator is part of the numerator
8. The natural history of the disease begins with the following except
   a. Exposure to risk factors of the disease
   b. Accumulation of factors capable of causing a disease
   c. Susceptibility of the persons
   d. Presence of signs and symptoms
9. The proportion of exposed persons who become infected is referred to as
   a. Virulence – degree of pathogenicity
   b. Infectivity
   c. Pathogenicity – ability to cause a disease
   d. Holo endemic – Constant num of cases
10. In order for a disease agent to survive, it must be able to do the following except
    a. Infect a new host.
    b. Reach a new host
    c. Originate from a reservoir
    d. Multiply
11. Which of the following is not a type of carrier?
    a. Asymptomatic carriers
    b. Symptomatic carriers
    c. Chronic carriers
    d. Convalescent carriers

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

12. Which of the following disease does not have animals as the reservoir?
    a. Brucellosis
    b. Legionnaires bacillus
    c. Plague
    d. Trichinosis
13. The type of transmission by direct spray over a few feet before they fall on the ground is called?
    a. Direct contact
    b. Droplet spread
    c. Mechanical
    d. Droplet nuclei
14. Which of the following is not a vector?
    a. Ants
    b. Mosquitoes
    c. Fleas
    d. Ticks
15. The type of immunity whereby antibodies develop in response to infection, vaccine or toxoid is called?
    a. Active immunity
    b. Passive immunity
    c. Natural immunity
    d. Herd immunity
16. Which of the following is not a reservoir for yellow fever?
    a. Aedes aegypti
    b. Monkeys
    c. Soil
    d. Vertebrates
17. Which of the following is not true about relative risk?
    a. Can also be referred to as risk ratio
    b. Can compare the risk of disease in two groups
    c. The group of primary interest is the un exposed group
    d. The two groups are typically differentiated by demographic factors
18. Prevalence can be increased by the following except
    a. Addition of new cases
    b. Improved treatment
    c. Recovery
    d. Death
19. Which of the following is not true about attributable risk?
    a. Is a measure of risk in cohort studies
    b. The rate of disease among exposed persons that can be directly attributable to specific exposure
    c. Is the risk difference between exposed and non-exposed individuals
    d. It a measure of association
20. The ratio of the number of ways an event can occur to the number of events cannot occur is called?
    a. Relative risk
    b. Odds of an event
    c. Odds ratio
    d. Relative odds

SECTION TWO: SHORT ANSWER QUESTIONS (30 MARKS)

1. Name five components in the definition of epidemiology (5 marks)
2. Three terms are used to describe infectious diseases according to the various outcomes that may occur after exposure to its causative agent. State them (5 Marks)
3. Briefly explain how epidemiology is used in the evaluation of efficacy and effectiveness of therapeutic and preventive interventions (5 Marks)

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

4. Epidemiologists and clinicians approach the same patient differently, explain (5 Marks)
5. State the two major classifications of causes of disease (5 Marks)
6. Differentiate between holo-endemic and hyperendemic (5 marks)

SECTION THREE: LONG ANSWER QUESTIONS (20 MARKS)

Q1.

a. Explain the design of case control study using smoking and lung cancer as examples (10 Marks)
b. What are interventional studies (5 Marks)
c. Name three advantages of interventional studies (3 Marks)
d. List two disadvantages of interventional studies (2 marks)
