PHARMACOLOGY II

SECTION 1: MULTIPLE CHOICE QUESTIONS (20 MARKS)

1. One of the following is a positive inotropic drug of glycoside structure:
   A. Dopamine
   B. Digoxin
   C. Dobutamine
   D. Adrenalin
2. Somatostatin inhibits the release of:
   A. Growth hormone
   B. Insulin
   C. Thyrotropin
   D. Prolactin
3. General unwanted effects of vasoconstrictors are:
   A. Increase of arterial pressure
   B. Increase of cardiac output
   C. Decrease of peripheral blood flow
   D. Increase of blood volume
4. The minimal alveolar concentration of an inhalational anaesthetic is a measure of its:
   A. Potency
   B. Therapeutic index
   Diffusibility
   C. Oil: water partition coefficient
5. _____is a drug that increases cardiac output:
   A. Noradrenalin
   B. Methyldopa
   C. Phenylephrine
   D. Angiotensinamide
6. Captopril produces greater fall in blood pressure in:
   A. Diuretic treated patients
   B. Patients having low plasma renin activity
   C. Sodium replete normotensive individuals
   D. Untreated Congestive Heart Failure patients
7. The following diuretic agent has a potent and rapid effect:
   A. Furosemide
   B. Spironolactone
   C. Dichlothiazide
   D. Indapamide
8. The following statement is true regarding Flumazenil
   A. Is cleared by the kidneys
   B. Predictably reverses benzodiazepine induced respiratory depression
   C. Antagonizes CNS effects of opioids

SCAN AnyScanner

D. Can precipitate seizures in mixed overdose

9. A patient taking loop diuretics or thiazide diuretics for congestive heart failure (CHF) should be monitored for:
   A. Hyperkalemia
   B. Hypocalcemia
   C. Hypokalemia
   D. Hyponatremia

10. For digitalis-induced arrhythmias the following drug is favorable:
   A. Verapamil
   B. Amiodarone
   C. Lidocaine
   D. Propanolol

11. The common side effects of atropine include:
   A. Sedation, Ataxia, urinary retention
   B. Hypotension, tremors, frontal headache
   C. Vomiting, constipation, urinary retention.
   D. Muscle relaxant, vomiting, sedation

12. One of the following statements is true about mannitol:
   A. Inhibits water absorption in proximal tubule, loop of Henle and collecting tubule
   B. Is metabolized to glycerol
   C. Decreases total body water and total body cation content equally
   D. Is of no value when renal hemodynamics are compromised

13. Choose the drug irritating the gut and causing increased peristalsis:
   A. Phenolphthalein
   B. Methyl cellulose
   C. Proserine
   D. Mineral oil

14. Regarding omeprazole, the nurse should instruct the patient to:
   A. Take after meals to increase drug effectiveness
   B. Take before meals to increase drug effectiveness
   C. Take with meals to increase drug effectiveness
   D. May take without regard to meals or other medications

15. Select the drug which inhibits peristalsis:
   A. Castor oil
   B. Bisacodyl
   C. Loperamide
   D. Sorbitol

16. Match the drugs in Column A to their reversing agents in Column B

Column A

I. Paracetamol……

AnyScanner

II. Warfarin.....

Column B

A. Protamine Sulphate
B. Vitamin K
C. N-Acetylcysteine
D. Naloxone

17. Indicate the drug belonging to proton pump inhibitors:
    A. Tinidazole
    B. Ranitidine
    C. Omeprazole
    D. Trimethaphan
18. Indicate if the following statement is true or false concerning anesthetic drug
    a) Induces anesthesia smoothly and rapidly and secure rapid recovery.....
    b) Possess a wide margin of safety.....
19. The antidepressant of choice for treatment of bulimia is:
    A. Amitriptyline
    B. Fluoxetine
    C. Imipramine
    D. Tranylcypromine
20. Mr. T is 90 years old admitted in the ward. He has benzodiazepines as part of his treatment. The most suitable benzodiazepine for Mr. T is:
    A. Clorazepate
    B. Clordiazepoxide
    C. Triazolam
    D. Prazepam

SECTION 2: SHORT ANSWER QUESTIONS (40 MARKS)

1. State four (4) causes of drug non adherence. (4 Marks)
2. With the exception of the five drug administration rights, state five (5) specific nursing responsibilities to a patient taking Angiotensin Converting Enzyme inhibitors (5 Marks)
3. Outline six (6) roles of a nurse in care of a patient on diazepam (6 Marks)
4. Explain three (3) classifications of insulin preparations (6 Marks)
5. Describe five (5) classes of drugs for treating peptic ulcer disease (5 Marks)
6. State five (5) contraindications of oral hypoglycemic agents (5 Marks)
7. Outline five (5) classes of antiemetic drugs giving one example in each class (5 Marks)
8. You are nursing a patient with oesophageal cancer currently on vincristine. State five (5) side effects of the drug that the patient may experience. (5 Marks)
