KENYA MEDICAL TRAINING COLLEGE
FACULTY OF INFORMATION TECHNOLOGY AND MEDICAL EDUCATION
DEPARTMENT OF HEALTH RECORDS AND INFORMATION

FINAL QUALIFYING EXAMINATION
FOR
DIPLOMA IN HEALTH RECORDS AND INFORMATION TECHNOLOGY

PAPER: DATABASE MANAGEMENT - THEORY

DATE: 1ST OCTOBER, 2021 TIME: ~~3 HOURS~~ 40 MINUTES (~~9.00~~ A.M – ~~12.00~~ 8.00 AM – 8.40 AM A.M)

INSTRUCTIONS

1. This paper consists of:
   - Section 1 (40 Multiple Choice Questions)
2. Attempt **ALL** Questions
3. Write the EXAMINATION **NUMBER** given on all the answer sheets provided and on the question paper.
4. Ensure that all examination answer scripts are handed in at the end of the examination
5. Ensure you sign the examination register provided

EXAMINATION NUMBER .....

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

SECTION ONE: MULTIPLE CHOICE QUESTIONS

1. A collection of interrelated records is called a? .....
   A. Database
   B. Spreadsheet
   C. Management information system
   D. Text file
2. Microsoft Access is a _____
   A. Network Database Model
   B. RDBMS
   C. ORDBMS
   D. OODBMS
3. Which one of the following is not an object of Ms-access?
   A. Macro
   B. Row
   C. Screen input
   D. File structure
4. Which option allows us to build a new table by entering data directly into a tabular grid?
   A. Datasheet View
   B. Design View
   C. Linked Table
   D. Grid View
5. External database is
   A. Database created using DBMS package
   B. Database created in MS-Word
   C. Database created in EXCEL
   D. All of the above
6. A primary key in any table has the properties
   A. Not Null
   B. No Duplicates
   C. Both A and B above
   D. None of above
7. Report generators are used to
   A. Store data input by a user
   B. Retrieve information from files
   C. Answer queries
   D. Both (b) and (c)
8. The logical data structure with a one-to-many relationship is a
   A. Tree
   B. Chain
   C. Network
   D. All of these
9. In a database, related fields are grouped to
   A. File
   B. Bank
   C. Menu
   D. Data record
10. In one-to-many relationship the table in 'one' side is called _____ and on 'many' side is called _____
    A. Child, Parent
    B. Parent, Child
    C. Brother, Sister
    D. Father, Son
11. The database environment has all the following components except
    A. Database administrator
    B. Database
    C. Users
    D. Separate files
12. Which one of the following is not a type of data type?
    A. OLE Object
    B. Number
    C. Field size
    D. Currency
13. Which database handles full text data, image, audio and video?
    A. Multimedia database
    B. Video on demand database
    C. Graphics database
    D. Transaction database

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

14. What do you mean by one to many relationships between Teacher and Class table?
    A. One class may have many teachers
    B. One teacher can have many classes
    C. Many classes may have many teachers
    D. Many teachers may have many classes
15. Define the term of input mask
    A. It is a field property that controls the value of a record and sets in a specific format.
    B. It is an association among several entities
    C. It's a collection of related fields that represent a single entity
    D. It a collection of related record
16. In one-to-many relationship the table on 'many' side is called
    A. Parent
    B. Child
    C. Sister
    D. Master
17. In which state one gathers and lists all the necessary fields for the database design project.
    A. Data Definition
    B. Data Refinement
    C. Establishing Relationship
    D. None of The Above
18. Which of the following enables us to view data from a table based on a specific criterion?
    A. Form
    B. Query
    C. Macro
    D. Report
19. Which database object is ideal to view, change, and analyze data in different ways?
    A. Table
    B. Form
    C. Query
    D. Report
20. Which data type allows alphanumeric characters and special symbols to be entered?
    A. Text
    B. Memo
    C. Auto number
    D. Mixed
21. The size of Yes No field is always
    A. 1 bit
    B. 1 byte
    C. 1 kilobyte
    D. 1 megabyte
22. It is used to establish an association between related tables.
    A. Line
    B. Relationship
    C. Primary Key
    D. Records
23. This key that uniquely identifies each record is called :
    A. Primary Key
    B. Key Record
    C. Unique Key
    D. Field Name
24. Which field type will you select if you need to enter long text in that field?
    A. Text
    B. Memo
    C. Currency
    D. Hyperlink
25. Which of the following is not a type of MS Access database object?
    A. Table
    B. Form
    C. Worksheets
    D. Modules
26. In which method we don't need to specify the field type and size while creating a new Table?

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

A. Design View
B. While using Wizard
C. Create Table by Entering Data
D. All of Above

27. The size of yes/no field is always _____
A. 1 Bit
B. 1 Byte
C. 1 Character
D. 1 KB

28. The size of a field with number data type cannot be _____
A. 2
B. 4
C. 8
D. 16

29. How can you edit a relationship already established between two tables?
A. Right click the relationship line and choose Edit Relationship
B. Double click the relationship line
C. Both of above
D. None of above

30. Which of the following option creates a Drop down List of values?
A. Ole Object
B. Hyperlink
C. Memo
D. Lookup Wizard

31. What can be the maximum length of a text field?
A. 120
B. 255
C. 265
D. 75

32. What Cascade Delete option is used for?
A. It is used to delete all the records of all tables in a database
B. It repeats the recent delete operation to all the records of current table
C. It ensures that all the related records will be deleted automatically when the record from parent table is deleted.
D. It is used to delete all the records of related tables in a database

33. While creating relationship using mouse, how the mouse pointer looks like?
A. A thick plus sign
B. A thin plus sign
C. An outlined rectangle
D. Arrow with Plus sign

34. The columns in a Microsoft access table are also called _____
A. Rows
B. Records
C. Fields
D. Columns

35. In the context of Microsoft Access, which of the following statement is true?
A. Reports are used to retrieve and calculate data from tables
B. Queries can be printed and presented as the information
C. Queries can include calculated fields that do not exist in table
D. Reports and forms are similar but forms are used to print but reports to display on screen only

36. Which of the following is not a field type in Microsoft Access?
A. Memo
B. Hyperlink
C. Ole Object
D. Lookup Wizard

37. While creating relationship, what happens when you release mouse pointer after you drop the primary key of a table into foreign key of another table?

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

A. A relationship is created
B. Edit relationship dialog box appears
C. A connector symbol is created
D. A connecting Line is visible

38. What is a form?
A. Forms are used only to view information.
B. Forms can be previewed on the screen, but they are usually printed.
C. Forms generally provide a detailed took at records and usually for the people who actually work with the database.
D. Forms are often used to group and summarize data, and are often for the people who don't work with the database but who use its information for other business task.

39. What is the size limitation for an access database
A. 255 gigabytes
B. 1 gigabyte
C. 266 gigabytes
D. 1000 gigabytes

40. _____ enables the user to automatically insert numbers in a sequential or random number.
A. Auto Number
B. Look up Wizard
C. Hyperlink
D. Ole object
