   a) Injuries and accidents
   b) Diabetes and cardiovascular diseases
   c) Cholera and Typhoid
   d) Drug and substance abuse
4. One function of vitamin B12 is:
   a) Protein synthesis
   b) Helps in sexual organs maturation
   c) Muscles contraction
   d) Keeps blood cells healthy and nerves
5. The original vaccines launched by EPI program includes:
   a) Oral Polio Vaccine, Pentavalet, measle, Tetanus Toxoid
   b) Inactivated Polio Vaccine, Rota Virus
   c) Bacilli Calmelle Guerin, Diphtheria Pertussis Tetanus, Tetanus Toxoid, Oral Polio Vaccine
   d) Diphtheria Pertussis Tetanus, Bacilli Calmelle Guerin, Rota Virus, Pneumococal Conjugate Vaccine
6. The shake test is used to monitor:
   a) Heat accumulation in a vaccine
   b) Cold accumulation in a vaccine Expiry time of a vaccine
   c) Sedimentation rate of a vaccine
7. The criteria required for caries formation includes
   a) Tooth surface - dentin
   b) Tooth surface - Root
   c) Tooth surface - Nerves
   d) Tooth Surface - Blood Supply

8. The biotic factors to consider in ensuring a healthy environment includes:
   a) Land, roads, industries- abiotic
   b) People, bacteria, animals
   c) Work, money, animals
   d) People, roads, industries

9. The following is an example of water dispersed disease: spread
   a) Onchocerciasis
   b) Cryptosporidiosis
   c) Legionella
   d) House-borne typhus

10. Contamination involves
   a) Colonization by microorganisms
   b) Subclinicals – inapparent infections
   c) Presence of infectious agent
   d) Lodgement of micro-organisms

11. The immunity acquired after successful vaccination is
   a) Herd immunity
   b) Natural active immunity
   c) Artificial active immunity
   d) Natural passive immunity

12. The following mineral forms half of the total body content:
   a) Phosporous
   b) Chlorine
   c) Magnesium
   d) Calcium

13. Levonorgestrel contraceptive pill acts within: Emergency
   a) Up to 120 hours after unprotected sex
   b) Up to 24 hours after unprotected sex
   c) Up to 72 hours after unprotected sex
   d) Up to one week after unprotected sex

14. The patch contraceptive is composed of
   a) Oestrogen and levonorgestrel
   b) Oestrogen and progesterone
   c) Oestrogen
   d) Levonorgestrel

15. The effectiveness of progesterone only contraceptive is: POP
   a) 98%
   b) 85%
   c) 99%
   d) 92%

16. The sexually transmitted diseases caused by viruses include:
    a) Human papilloma and chlymidia
    b) Herpes and chlymidia
    c) Hepatitis B and human papilloma
    d) Syphilis and Hepatitis B
17. The prevention of the spread of HIV includes condom use and one of the following:
    a) Ensuring screening of some blood before transfusion
