KENYA MEDICAL TRAINING COLLEGE
FACULTY OF NURSING
DEPARTMENT OF NURSING

FINAL QUALIFYING EXAMINATION
FOR
DIPLOMA IN COMMUNITY HEALTH NURSING

PAPER: GENERAL PAPER

DATE: 24th January 2020 **TIME: 3 HOURS (9:00AM – 12:00 NOON)**

INSTRUCTIONS

1. This paper consists of:
   - Section 1 (40 Multiple Choice Questions)
   - Section 2 (8 Short Answer Questions)
   - Section 3 (1 Long Answer Question)
2. Attempt **ALL** Questions
3. Write the EXAMINATION **NUMBER** given on all the answer sheets provided and on the question paper.
4. Ensure that all examination answer scripts are handed in at the end of the examination
5. Ensure you sign the examination register provided

EXAMINATION NUMBER .....

SECTION 1

MULTIPLE CHOICE QUESTIONS (40 MARKS)

1. The appropriate sitting arrangement in a demonstration session is
   a) Modified traditional sitting
   b) Modular sitting
   c) Horse shoe sitting
   d) Circular sitting
2. Non-projected teaching aids includes
   a) Slides, videos, pictures
   b) Real objects, handouts, pictures
   c) Flipcharts, slides, pictures
   d) Diagrams, videos, slides
3. The following is a merit of essay question in evaluation of learning
   a) It is easy to grade student performance
   b) It can assess a wide range of learning domains
   c) It is free from subjective scoring
   d) It can be used to asses learner's understanding to concepts
4. In self-directed learning
   a) Students learns at teacher's pace
   b) Students are passive in learning process
   c) Students acquire independence in learning process
   d) Students learn without guidance by the teacher
5. The component of "Teacher's activity" in a lesson plan
   a) Enables the teacher to formulate learning objectives
   b) Enables the teacher to evaluate learning outcomes
   c) Enables the learner to cover learning content
   d) Enables the teacher to identify means of activity involving learners
6. When using a flip chart as a teaching aid, the teacher should
   a) Use as few words as possible
   b) Use one flipchart to display all his/her teaching content
   c) Use both sides of the flipchart to minimize wastage
   d) Display flipchart together with other teaching aids for easy delivery of learning content
7. Continuous Assessment Tests (CATs)
   a) Enables teachers to select students for higher learning
   b) Enables certification of learners in an academic program
   c) Enables teachers to diagnose students learning needs
   d) Helps teachers to promote learners from one level of learning to another

8. When selecting a clinical teaching method, the teacher should consider
   a) Availability of resources, objectives to be met, availability of patients
   b) Cost of the method, willingness of qualified nurses, available resources
   c) Level of student training, willingness of the students, permission from the school
   d) Permission from school, number of students, work load
9. Psychomotor learning domain deals with
   a) Attitude
   b) Knowledge
   c) Teaching methods
   d) Skills
10. The sequential steps in using a teaching aid are
   a) Evaluating, planning, previewing, selecting, presenting
   b) Selecting, previewing, planning, presenting, evaluating
   c) Planning, selecting, evaluating, presenting, previewing
   d) Presenting, evaluating, selecting, presenting, planning
11. Reliability in research process refers to
   a) Ability of the research questions to relate to study objective
   b) Consistency of research findings
   c) Ability of the research tool to measure intended attributes
   d) Ability of the respondents to comprehend data collection tool
12. In a study titled "uptake of family planning services among adolescent girls", the dependent variable would be
   a) Cost of family planning services
   b) Adolescent girls accessing family planning services
   c) Attitude of health care provider towards adolescent girls
   d) Uptake of family planning services
13. Literature review enables the researcher to
   a) Narrow the research topic
   b) Identify the sample size in a study
   c) Gather information from research respondent
   d) Pretest data collection tool before administering it to the respondents
14. The appropriate sequence in citing a research article is
   a) Year, Journal, Author, Volume, Issue, Page Number, Title
   b) Journal, Author, Year, Volume, Issue, Page Number, Title
   c) Author, Year, Title, Journal, Volume, Issue, Page Number
   d) Title, Author, Year, Journal, Volume, Issue, Page Number
15. Appendices included in a research report are
   a) Conceptual framework, map of study area, data collection tool
   b) Letters of authority, Bibliography, Work plan
   c) Study budget, consent form, Bibliography
   d) Gantt chart, data collection tool, map of the study area

16. Measures of dispersion include

a) Range, Mean, Variance

b) Range, Variance, Standard deviation

c) Standard deviation, Mean deviation, Mode

d) Median, Variance, Mean deviation

17. Likert's scale in data collection is best appropriate in

a) Assessing quantitative variables in a study

b) Examining correlational differences among variables

c) Determining validity of findings in a study

d) Examining affective characteristics of the study population

18. In a study to determine the effect of health education on exclusive breastfeeding, the researcher observes increase in health education increases practice in exclusive breastfeeding. The researcher would conclude that

a) There is positive correlation between the two variables

b) The two variables are inversely related

c) There is minimal effect of health education on exclusive breast feeding

d) There is negative correlation between the two variables

19. The most appropriate data presentation method for a continuous data set is

a) Time series line graph

b) Bar graph

c) Histogram

d) Pie chart

20. When testing the study hypothesis, the researcher observes existence of type I error. This would mean

a) The study rejected the true null hypothesis

b) The study rejected the true alternative hypothesis

c) The relationship of the variables represents the true situation

d) The study failed to reject the true null hypothesis

21. During alarm reaction of stress response

a) The client has increased sympathetic nervous stimulation

b) The victims body becomes resistant to stress

c) The immune system is totally diminished

d) There is renewed source of energy

22. The defense mechanism used by an individual to turn socially unacceptable behavior into socially acceptable behavior is

a) Identification

b) Sublimation

c) Conversion

d) Suppression

23. The mode of admission into a psychiatric unit of a person with mental illness arrested by a police because he is found to be dangerous and destructive is

a) Involuntary
b) Juvenile
c) Voluntary
d) Emergency

24. The typical clinical features of child with autism are
    a) Hyperactivity, Inattention, Repetitive stereotypical behavior
    b) Inability to relate well, Stereotyped behavior, Poor development of speech
    c) Persistent eating of non-nutritive substances, Inability to relate well, Body rocking
    d) Thumb sucking, neck jerking, Hyperactivity

25. Indicate whether the following statements are true or false
    a) Patients with Trichotillomania have uncontrollable urge to set fires
    b) Graded exposure is an effective approach in management of Agoraphobia

26. When assessing premorbid personality in a patient with mental illness, the psychiatric Nurse focuses on
    a) Marital status, Occupation, Ambitions
    b) Forensic History, Medical illness, Residence
    c) Milestones, Memory, Sexual development
    d) Ambitions, Personal interests, Personal Values

27. The extra-pyramidal side effects of Antipsychotic drugs include
    a) Dystonia, Tardive dyskinesia, Akathisia
    b) Parkinsonism, Dystonia, Dry mouth
    c) Increased libido, Blurred vision, Akathisia
    d) Akathisia, Dry mouth, Tardive dyskinesia

28. A patient with mental illness who creates his own words and gives them meaning is displaying
    a) Word salad
    b) Echopraxia
    c) Neologism
    d) Anhedonia

29. Paranoid Schizophrenia is characterized by
    a) Excessive negativism
    b) Stupor
    c) Delusion of persecutory
    d) Manic episodes

30. The mental disorder characterized by strong belief that physical symptom is a sign of serious illness despite medical reassurance is
    a) Somatization disorder
    b) Hypochondriasis
    c) Conversion disorder
    d) Body dysmorphic disorder

31. Pitting oedema of the lower leg is commonly associated with the malnutritional disorder in children

a) Protein Energy Malnutrition
b) Kwashiorkor
c) Marasmus
d) Biotin deficiency

32. The drug of choice in treating a child with severe pneumonia is

a) Amoxicillin
b) Benzyl Penicillin
c) Amphoteriem-B
d) Cotrimoxazole

33. The priority nursing intervention for a child with measles would be

a) Promoting skin care
b) Controlling electrolyte and fluid balance
c) Administration of prescribed antibiotics
d) Isolation of the child to decrease transmission

34. The main aim of surgical correction of cleft palate is to

a) Promote effective sucking patterns
b) Improve physical appearance of the child
c) Reduce anxiety of the parents
d) Promote swallowing

35. Megaloblastic anemia in children is caused by

a) Deficiency of iron
b) Pathological hemolysis of red blood cells
c) Deficiency of cobalamin
d) Abnormal spherical shape of red blood cells

36. The most common clinical symptoms of Wilm's tumour in children is

a) Firm abdominal mass
b) Marked edema of the face
c) Increased frequency of micturition
d) Marked anemia

37. Klinefelter syndrome is associated with

a) Excessive hair growth
b) Microcephally
c) Cardiomyopathy
d) Micro orchidism

38. The priority nursing intervention for a child with severe asthma would be to

a) Administer salbutamol inhaler two puffs
b) Nebulize with 2.5mg salbutamol with mask
c) Perform tracheostomy to enhance breathing
d) Promote effective airway clearance

39. The clinical presentation of a child with nephrotic syndrome would be

a) Periorbital edema, Ascites, Peritonitis
b) Pleural effusion, Intracranial hemorrhage, Ascites
c) Hematuria, Hypertension, Intracranial hemorrhage
d) Pleural effusion, Intracranial pressure, Hematuria

40. Indicate whether the following statements are true or false

a) The standard oxygen flow using nasal prong in neonates is 0.5 L/mm
b) Convulsions occurring in the first one month of life are treated using Phenobarbitone

SECTION 2

SHORT ANSWER QUESTIONS (40 MARKS)

1. a) Draw a well labelled diagram showing the human ear (5 marks)

   b) Outline FOUR nursing interventions for a child with acute otitis media (4 marks)

2. Explain Jone's criteria for diagnosing Rheumatic heart Disease (4 marks)
3. Formulate FOUR nursing diagnosis for a child with Tetralogy of Fallot (4 marks)
4. State FIVE advantages of competence-based learning (5 marks)
5. Explain the acronym "SPICES" as used in modern teaching and learning approaches (5 marks)
6. State FOUR non-probability sampling techniques (4 marks)
7. Outline FOUR sources of bias in research process (4 marks)
8. State FIVE features of Histrionic Personality Disorder (5 marks)

SECTION 3

LONG ANSWER QUESTION (20 MARKS)

1. Mr. Zeed aged 32 years old is admitted in a psychiatric unit and a diagnosis of Bipolar I is made.
   a) State FOUR causes of Bipolar I (4 marks)
   b) Outline FOUR signs and symptoms Mr. Zeed may present with (4 marks)
   c) Discuss the management of Mr. Zeed until discharge (12 marks)
