FINAL QUALIFYING EXAMINATION
FOR
DIPLOMA IN HEALTH RECORDS AND INFORMATION TECHNOLOGY

PAPER: HEALTH STATISTICS

DATE: 12th JULY, 2021	**TIME: 3 HOURS (9:00AM – 12:00 NOON)**

INSTRUCTIONS

1. This paper consists of:
   - Section 1 (40 Multiple Choice Questions)
   - Section 2 (8 Short Answer Questions)
   - Section 3 (1 Long Answer Question)
2. Attempt **ALL** Questions
3. Write the EXAMINATION **NUMBER** given on all the answer sheets provided and on the question paper.
4. Ensure that all examination answer scripts are handed in at the end of the examination
5. Ensure you sign the examination register provided

EXAMINATION NUMBER .....

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

6. The first quartiles divide a frequency distribution in the ratio of

   a) 4:1
   b) 1:4
   c) 3:1
   d) 1:3

7. The following are measures of dispersion except

   a) Mean
   b) Mean deviation
   c) Skewness
   d) Standard deviation

8. A table that shows multiple columns and is used to measure a change of one variable in two different times is known as

   a) Contingency table
   b) Compound table
   c) Simple table
   d) Component table

9. The self-discharge of a patient without following the formal discharge process is

   a) To transfer
   b) To parole
   c) To abscond
   d) To referral

10. Facts and figures collected together for reference or analysis are called

    a) Data
    b) Statistics
    c) Information
    d) Presentation

11. A distribution where mean is less than the median and medium is less than the mode is termed to be

    a) Skewed to the right
    b) Symmetrical
    c) Skewed to the left
    d) Asymmetrical

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

12. Which two major variables do we measure in a research process?

a) Qualitative and quantitative
b) Independent and qualitative
c) Dependent and quantitative
d) Independent and dependent

13. Data collected from journals is known as

a) Discrete data
b) Sampling
c) Primary
d) Secondary

14. Which of the following is not categorical data

a) Hair colour
b) Opinion of the people
c) Education level
d) Smooth status

15. The number of times that a score occurs is referred to as

a) Array distribution
b) Frequency distribution
c) Score distributions
d) Frequency

16. Which of the following does not refer to allocated beds

a) Assigned beds
b) Bed management
c) Staffed beds
d) Available beds

17. …… is a value that is calculated for a group of data and it should be a representation of all the values and becomes the average

a) Measures of statistics
b) Measures of central tendency
c) Measures of variation
d) Measures of dispersion

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

18. Which of the following does not refer to median

a) The eleven value
b) 50th percentile
c) Middle value
d) Value dividing distribution into two equal parts

19. which measure of central tendency is affected by outliers

a) Mean
b) Median
c) Mode
d) Skewness

20. Which type of variables is characterized by gaps or interruption?

a) Discrete random
b) Continuous random
c) Qualitative
d) Quantitative

21. P x Q would always be

a) Less than one
b) More than one
c) Zero
d) One

22. Additional theorem states that if two events A and B are mutually exclusive, the probability of occurrence of either A and B is given by

a) P(A) + P(B)
b) P(B) x P(A)
c) P(A) – P(B)
d) P(A) x P(B)

23. If two evens A and B are dependent, the conditional probability of A given B is calculated as

a) P(B/A) (AB)
b) P(B/P(A))
c) P(AB/P(A))
d) P(AB)/P(B)

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

24. The standard duration of binomial distribution is

a) √nap
b) √npq
c) Npq-npq
d) Np-np

25. When variables are not measurable, which of the following is to be represented

a) Nominal
b) Ordinal
c) Interval
d) Ratio

26. Which of the following is not a discrete variate?

a) Skin colour
b) Blood pressure
c) Weight
d) Boys in class

27. Which of the following types of diagrams can be used to find out the relationship between two variables?

a) Pictogram
b) Bar diagram
c) Histogram
d) Scatter diagram

28. A pictorial diagram of frequency distribution is denoted by

a) Line chart
b) Pictogram
c) Histogram
d) Pie chart

29. The "real limits" of the class interval 2-4 are

a) 2.5 and 4.5
b) 2 and 4
c) 1.5 and 4.5
d) 1.5 and 3.5

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

30. If mean, median and mode are 10, 16 and 22 respectively, the distribution is

a) Symmetric
b) Normal
c) Positively skewed
d) Negatively skewed

31. If "V: stands for variation and "S" stands for standard deviation, then the relation between V and S is

a) V=S
b) $V=\sqrt{S}$
c) $V^2 = S$
d) $S^2 = V$

32. The ratio of 3:1 is achieved by

a) Quartile
b) Median
c) 3rd quartile
d) 1st quartile

33. Area between one standard deviation on either side of mean in normal distribution curve is

a) 50%
b) 68%
c) 136%
d) 95%

34. A type I error is committed when?

a) False H_0 is accepted
b) True H_0 is rejected
c) True H_1 is accepted
d) False H_1 is rejected

35. P-valve is the probability of

a) Rejecting H_0 when it is true
b) Accepting H_0 when it is true
c) Rejecting H_0 when it is false
d) Rejecting H_1 when it is true

36. Which of the following is unrelated to the chi-square test of significance

a) Degree of freedom
b) Life table
c) Significance level
d) Qualitative data

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

37. Which of the following statements is true about simple random sampling

a) Techniques that provide least number of possible samples
b) Every fixed unit is taken for selection
c) All units have equal chance to be selected
d) Only selected units have right to be selected

38. for a survey, a village is divided into 5 lanes then each is sampled randomly. It is an example of

a) Simple random sampling
b) Stratified random sampling
c) Systematic random sampling
d) Multi-stage random sampling

39. Median is almost equivalent to

a) 25th percentile
b) 50th percentile
c) 75th percentile
d) 10th percentile

40. The semi interquartile range is most closely related to

a) Mean
b) Median
c) Mode
d) Range

SECTION 2: SHORT ANSWER QUESTIONS (40 MARKS)

41. State five principles of questionnaire construction (5 marks)
42. Describe the stratified sampling method approach (5 marks)
43. Outline five characteristics of statistical data (5 marks)
44. Describe five application of vital statistics in health sector (5 marks)
45. Describe five uses of Lorenze curve (5 marks)
46. In the year 2018, Kocholia sub-county hospital had 800 beds permanently allocated for in-patient use during the same period the percentage occupancy was 110% and 1500 patients were discharged home alive while 20 died. Calculate

(i) Turn over per bed (3 marks)
(ii) Available bed days ABD (2 marks)

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

47. Outline 5 important points to consider while constructing a histogram (5 marks)
48. Find the area under normal curve less than 1.64 (5 marks)

SECTION THREE: LONG ANSWER QUESTIONS (20 MARKS)

49. A random of 50 male employees is taken at the end of a year and the mean number of hours of absenteeism for the year is found to be 63 hours. A similar sample of 50 female employees has a mean of 66 hours. Could these samples be drawn from a population with the same mean and standard deviation of 10 hours? (10 marks)
50. In 2001, Moding Health Centre recorded 11,676 inpatients days, 130 discharges and death and the health facility has a capacity of 30 beds. Calculate (10 marks)

    (i) ABD (1 mark)
    (ii) EVBD (1 mark)
    (iii) Percentage occupancy (1 mark)
    (iv) Average length of stay (ALOS) (2 marks)
    (v) Supposing this unit represent 25% of the entire health facility bed and inpatients days. Calculate the entire health facility statistics. (5 marks)

COMMUNITY HEALTH

SECTION 1- MULTIPLE CHOICE QUESTIONS (40 MARKS)

1. The following are mortality indicators except

   a) Mortality rates
   b) Crude death rates
   c) Infant mortality rates
   d) Attendance rates

2. Which is the best control measures for HIV/AIDS

   a) Being faithful to a single partner
   b) Using a condom during each sexual act
   c) Avoiding sexual contact with commercial sex workers
   d) Making sure that one's sexual partner does not have signs of HIV/AIDS

3. When determining the possible sources of sexually transmitted infections, which is the best method that may be undertaken by community health officer

   a) Contact tracing
   b) Community survey
   c) Mass screening test
   d) Interview the suspect

4. Isolation of a child with measles belong to what level of prevention

   a) Primary prevention
   b) Secondary prevention
   c) Intermediate prevention
   d) Tertiary prevention

5. A fairly constant number of new cases in a community is

   a) Endemic
   b) Pandemic
   c) Sporadic
   d) Epidemic

6. Which of the following is an essential part of all living cell and is needed for growth and repair of tissues

   a) Calcium
   b) Protein
   c) Vitamin
   d) Glycogen

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

7. Foreign substance that stimulate immunity such as bacteria or virus is called

a) Antibody
b) Drugs
c) Antigen
d) Foreign matter

8. …… refers to things which people learn, share and pass on to later generation

a) Genes
b) Norms
c) Behaviour
d) Culture

9. …… in PHC means equal and reasonable distribution of available resources to all individuals and families

a) Sharing
b) Equitable distribution
c) All of the above
d) None of the above

10. ….. is a group of people in a given area which receives or are served by a health program

a) Target population
b) Community
c) Population coverage
d) Sick people

11. The following are various stages of disease

a) Primary prevention of disease
b) Tertiary prevention of disease
c) Stage of recovery, disability or death
d) Secondary level of prevention of disease

12. Screening of a disease process for early identification and prompt treatment is an example of

a) Primary prevention
b) Secondary prevention
c) Tertiary prevention
d) Both primary and secondary prevention

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

13. The stage of a disease in which signs and symptoms usually occur is called

a) Stage of subclinical disease
b) Stage of disability
c) Stage of clinical disease
d) Stage of susceptibility

14. The following individuals are the most at risk of contracting malaria

a) Pregnant women
b) Old men
c) Children
d) Travelers from non-endemic areas

15. Which one of the following is NOT an essential element of primary health care (PHC)

a) Multi sectoral approach
b) Community involvement
c) Appropriate technology
d) Qualification of heath providers

16. Which behavioral risk factors does not contribute to a person developing a non-communicable disease

a) Having unprotected sex
b) Harmful use of alcohol
c) Unhealthy diet
d) Physical inactivity

17. The term used to refer to different sectors such as health, education, agriculture, etc working together is

a) Community participation
b) Community engagement
c) Inter-sectoral collaboration
d) All of the above

18. ….. is the infected person or animal carrying the pathogen

a) Carrier
b) Agent
c) Reservoir
d) Transmitter

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

19. The type of immunization which produces permanent scar is called

a) NMR
b) PCV
c) RVI
d) BCG

20. The process of not allowing patients to come into contact with rest of the population to avoid the spread of diseases is called

a) Quarantine
b) Isolation
c) Admission
d) Detention

21. In Kenya of community health workers' movement was initiated following which meeting

a) Alma Ata conference
b) WHO conference in Nairobi
c) WHO conference in Geneva
d) MOH TWG

22. Health is a responsibility of

a) The government
b) Health care workers
c) County governments
d) Everyone in the community

23. Tertiary diseased prevention levels aim at

a) Reducing disability
b) Presenting the spread
c) Screening those infected with diseases
d) Caring those infected

24. When choosing priorities from a list of community health problems, what should we consider?

a) Health of community
b) Resources in the community
c) Seriousness of the problem
d) Community involvement

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

25. The process of raising awareness on specific issues among the community members is

a) Community mobilization
b) Community sensitization
c) Community participation
d) Community diagnosis

26. The following are factors affecting health seeking behaviour in the community

a) Cultural beliefs
b) Social demographic status
c) Women's autonomy
d) Health services and diseases patterns

27. The measures of an occurrence of an event is

a) Rate
b) Ratio
c) Proportion
d) Prevalence

28. Which of the following is an example of communicable disease

a) Hypertension
b) Diabetes
c) Arthritis
d) Covid 19

29. Which of the following factors does not contribute to unsafe abortion

a) Lack of access to contraception
b) Inability to cope with a child for economic, social or cultural issues
c) Inability to detain a legal abortion
d) Having knowledge about the effects of unsafe abortion

30. The following are barrier methods of contraception and family planning EXCEPT

a) Male and female condoms
b) Cervical caps
c) Coitus interruptus
d) Diaphragms

31. Which of the following is NOT a merit screening?

a) It helps to detect health problem for immediate intervention
b) Raise community awareness about health issues
c) Identify individual at risk and offer health education

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

d) Screening cures the disease that is present in the community

32. Which of the following represents the millennium development goal number 6

a) To combat HIV, Malaria and other diseases
b) To promote gender equality and women empowerment
c) To reduce child mortality
d) To improve maternal health

33. The process of administering an antigen material to stimulate an individual immune system against a certain disease is

a) Immunization
b) Vaccination
c) Culture
d) Injection

34. Wheel of health refers to

a) Is what health runs on
b) Is a wheel which spoke meaning something well and other time of illness
c) Is an illustration that health is a collective effort
d) All of the above

35. The following are modifiable factors of presenting non communicable diseases EXCEPT

a) Consumption of alcohol
b) Obesity
c) Smoking cigarettes
d) Hereditary factors

36. Which one is not a phase of health prevention

a) Hospital
b) Primary
c) Secondary
d) Tertiary

37. Which of the following is not a role of household and commodities community.

a) Health promotion
b) Monitoring health status to promote early detection of condition
c) Demanding healthy and social amenities
d) Offering first aid to the sick

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

38. Which of the following is a method of secondary disease prevention

a) Surveillance
b) Immunization
c) Management
d) Rehabilitation

39. Which of the following best describes the word malnutrition

a) Lack of vitamin D in the body
b) Lack of sufficient nutrients in the body
c) Low amounts of sugar levels in the body
d) Lack of enough food in the body

40. The following are viral diseases. Which one is NOT?

a) Small pox
b) Hepatitis
c) Anthrax
d) Corona

SECTION 2- SHORT ANSWER QUESTIONS (40 MARKS)

41. Define the following terms (5 mks)

(a) Community engagement
(b) Susceptible host
(c) Population coverage
(d) Risk factor
(e) Environment

42. List four methods of food preservation (5 mks)

43. Give five reasons for carrying out survey (5 marks)

44. Differentiate between biodegradable and non-degradable refuse (5 mks)
45. Describe three commonly used methods in the rural areas to dispose waste (5 mks)
46. Contraceptives are divided into four major categories. Write short notes on the categories and give three (3) examples of the methods under each category (5mks)
47. Define community strategy in reference to achieving health for all (5 mks)
48. State the role of family planning in your community (5 mks)

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

SECTION 3 - LONG ANSWER QUESTION (20 MARKS)

49. You have been posted to Nyamache level 3 hospital as the health records and information officer. Having checked hospital records, you realized that the community has high level of malnutrition among under five children, high prevalence of HIV/AIDS and poor health seeking behaviour.

(a) Describe the possible factors that have affected health seeking behaviour of this community (10 mks)

(b) Data shows that one out of 200 mothers die as a result of maternal complication. Can you advise the county director of health on community intervention that will reduce such maternal deaths? (10 mks)

HEALTH SYSTEMS MANAGEMENT

SECTION 1- MULTIPLE CHOICE QUESTIONS (40 MARKS)

1. A written down statement drawn by a manager to show the purpose, duties, responsibilities and relationships of a particular job is the best description of:
   a) Company policy description
   b) Employee specification
   c) Staff placement plan description
   d) Job description
   e) Workers specifications

2. Bringing nature to an office by natural things for instance flowers, painting of walls with natural sceneries if referred to as:
   a) Decoration
   b) Flowering the office
   c) Land scaping
   d) Flower bed

3. The most common form of communication in any organization is?
   a) Written
   b) Oral
   c) Non verbal
   d) Visual media

4. One of the most difficult task for a manager when he/she is coordinating activities is?
   a) Security cooperation
   b) Identifying the activities
   c) Utilizing the automation
   d) Planning the coordination efforts

5. Which one of the following is not a principle of time management?
   a) Time analysis
   b) Planning
   c) Goal setting
   d) Priority setting

6. Which one of the following is an attribute of a leader?
   a) Emotional appeal
   b) Spokesperson role
   c) Judge role
   d) Counselor role

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

7. Which one of the following is not a resource in management?
   a. Money
   b. Manpower
   c. Marketing
   d. Materials

8. Which of the following is a core value in civil service?
   a) Integrity
   b) Fairness
   c) Reliability
   d) All of the above

9. The following are components of a job description except?
   a) Posting order
   b) Duties
   c) Leave entitlement
   d) Job purpose

10. Which one of the following is an operational function of human resources management?
    a) Planning
    b) Organizing
    c) Compensation
    d) Controlling

11. Who is the scholar behind the development of Scientific Management Theory?
    a) Fredrick Taylor
    b) Max Weber
    c) Henri Fayol
    d) Abraham Maslow

12. Which one is not a traditional approach to studying leadership?
    a) Compassionate approach
    b) Trait approach
    c) Situational approach
    d) Behavioral approach

13. Which of the following is a characteristic of a functional health service system?
    a) Access to service
    b) Quality of care and service delivery
    c) Safety
    d) Health information

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

14. Unit of command and span of management are factors that a supervisor will deal with when?
    a) Influencing
    b) Organizing
    c) Planning
    d) Staffing

15. Which of the following best describes management?
    a) Process of coordinating people to achieve the organizational goal
    b) The pool of highly paid individuals who direct an organization
    c) Process of coordination resources to achieve certain results
    d) Getting things done through and with technical resources

16. Of the resources managed by the supervisor, which of the following is the important resource?
    a) Machinery
    b) Human resources
    c) Money
    d) Materials

17. All of the following describe planning except?
    a) Deciding in advance what is to be done in future
    b) A road map for managers
    c) A process performed by senior managers only
    d) A continuous process

18. Which of the following is not a principle of management according to Henry Fayol?
    a) Controlling
    b) Unit of command
    c) Remuneration
    d) Order

19. In decision making process a manager should?
    a) Develop alternative course of action
    b) Develop as many alternatives as possible
    c) Ensure that all employees contribute alternatives
    d) Limit the number of choices

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

20. Theory X stipulates the following EXCEPT
   a) The average worker dislikes like and must therefore be coerced into making maximum effort with inducements, sanctions and threats
   b) Employees can be relied up to exercise self-direction and control
   c) Workers are naturally reluctant to take responsibility preferring the security of being controlled
   d) Workers are happy with clearly defined tasks than broadly defined objectives

21. Which of the following is not a core value in civil service?
   a) Embezzlement
   b) Integrity
   c) Justice
   d) Equity

22. Which one of the following is not a function of management?
   a) Planning
   b) Communication
   c) Leading
   d) Organizing

23. Which one of the following is an operational function of human resource management?
   a) Planning
   b) Organizing
   c) Compensation
   d) Controlling

24. Which of the following outlines complete communication process?
   a) The sender and recipient of message
   b) The feedback, recipient, sender, message, channel
   c) Encoded and decoded message and feedback
   d) None of the above

25. The choice of options or alternatives is
   a) Planning
   b) Problem Solving
   c) Anticipation future actions
   d) Route to objectives

26. Who is the founder father of Administrative Management Theory of Management?
   a) Elton Mayor
   b) Max Weber
   c) Henry Fayol
   d) Fredrick Taylor W

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

27. Which one is NOT a skill of management
   a) Conceptual skills
   b) Diagnostic skills
   c) Human skills
   d) Operational skills

28. Which document is NOT used in finance department
   a) Voucher
   b) Requisition
   c) Invoice
   d) Receipt

29. The following are leadership styles EXCEPT?
   a) Free reign
   b) Autocratic
   c) Democratic
   d) Trait

30. Which of the following is not a characteristic of management?
   a) It's universal
   b) Social process
   c) Multi-disciplinary
   d) None of the above

31. In developing Bureaucratic Management Theory, Max weber believed that the theory would be
   a) Fairer
   b) More impartial
   c) More rational
   d) All of the above

32. Who is the scholar behind the Bureaucratic Management Theory?
   a) Fredrick W. Taylor
   b) Max Weber
   c) Henri Fayol
   d) Abraham Maslow

33. The kind of authority one has in taking action without consulting anybody is referred to as
   a) Perfect authority
   b) Undebatable authority
   c) Act after reporting authority
   d) All of the above

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

34. Financial management involves?
   a) Planning
   b) Controlling
   c) Monitoring of finance
   d) All of the above

35. Which term is used to mean determining the number of subordinates?
   a) Span of control
   b) Supervising
   c) Management
   d) Decentralization

36. Which statement best describes breakeven point in finances?
   a) Company neither making profit nor making loss
   b) Company makes profits and no losses
   c) Company makes losses than profits
   d) When the sales are directly proportional to volume of output

37. Which among the following is not an aspect of delegation?
   a) Authority
   b) Responsibility
   c) Accountability
   d) Power

38. The following are the steps involved in planning EXCEPT?
   a) The identification of organizational needs/problems
   b) Looking into the present, future and then coming up with logistics and strategies to be applied in solving the problems/needs identified
   c) Developing long and short-term goals and objectives related to the strategy
   d) None of the above

39. The following are correct about advertisement of a vacant post EXCEPT?
   a) Getting the most effective response at the lowest cost
   b) To encourage the most qualified persons to apply
   c) To discourage the unqualified interested persons from applying
   d) Encouraging any interested candidate to apply for advertised post

40. In human resource management, employment involves the following:
   a) Man power planning
   b) Forecasting on the future human resource needs
   c) Acquisition, utilization, improvement and preservation of staff
   d) None of the above

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

SECTION 2- SHORT ANSWER QUESTIONS (40 MARKS)

41. Briefly explain how resources can be controlled in an organization (5 marks)
42. State and explain the principles of planning in any company (5 marks)
43. Explain purchasing as a management function in an organization (5 marks)
44. Discuss the disaster management cycle using a bomb blast incident as an example. (10 marks)
45. Onesmus is a government employee. He comes to work late and takes alcohol during working hours. Recently he disappeared from work for two weeks only to appear claiming to be sick. He is however good in his work performance whenever he is at work. Explain the process of disciplinary procedure in this case. (5 marks)
46. State and explain five (5) major barriers to communication. (5 marks)
47. Staff motivation is key in achieving organization objectives. State and explain five (5) methods that the human resources can use to motivate staff in an organization (5 marks)

SECTION 3- LONG ANSWER QUESTION (20 MARKS)

48. In the face of COVID -19, health workers need constant training on how to handle the patients in the facilities. In details, explain ten (10) different methods of training the human resource can use to keep the staff updated and to reduce risk of transmission. (20 marks)

DIPLOMA IN HEALTH RECORDS AND INFORMATION TECHNOLOGY

PAPER: MEDICAL DEMOGRAPHY

DATE: 14th JULY, 2021	**TIME: 3 HOURS (2:00 – 5:00 P.M)**

INSTRUCTIONS

1. This paper consists of:
   - Section 1 (40 Multiple Choice Questions)
   - Section 2 (8 Short Answer Questions)
   - Section 3 (1 Long Answer Question)
2. Attempt **ALL** Questions
3. Write the EXAMINATION **NUMBER** given on all the answer sheets provided and on the question paper.
4. Ensure that all examination answer scripts are handed in at the end of the examination
5. Ensure you sign the examination register provided

EXAMINATION NUMBER .....

MEDICAL DEMOGRAPHY

SECTION 1- MULTIPLE CHOICE QUESTIONS (40 MARKS)

1. ..... is a scientific study of human population with respect to their size, structure and change
   a) Population growth
   b) Formal demography
   c) Scientific demography
   d) Population studies
2. ..... refers to the distribution of the population among its sex and age groupings.
   a) Size
   b) Structure
   c) Change
   d) Distribution
3. The following are uses of demographic information except
   a) Economic Planning
   b) Policy Making
   c) Administrative purposes
   d) Disease prevention
4. Census is the procedure of-systematically-acquiring and recording information about members of a given population. When conducting census, the following errors may occur except
   a) Errors of contents
   b) Estimating errors
   c) Errors of coverage
   d) Sampling error
5. The difference between birth and death is called .....of a population
   a) Natural increase
   b) Natural decrease
   c) Growth rate
   d) Population change
6. Which one of the following is not an example of life table?
   a) Period or static life tables
   b) Cohort life tables
   c) Clinical life table
   d) Cross-sectional life table
7. In life table qx denotes
   a) Probability that person of age x will not survive till x+1 (mortality ratio)
   b) Probability that a person will survive survival rate
   c) Average number person living between age x and x+1
   d) Total person living above age x years

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

8. Population change is calculated as
   a) Natural increase + Net migration
   b) Birth + deaths
   c) Birth – deaths
   d) Migration in- migration out
9. Moses a diploma student in health records and information technology was detecting age errors using whipples index and its answer was between 105-110 what would be its interpretation
   a) Fairly accurate
   b) Approximately Accurate
   c) Rough accurate
   d) Highly accurate
10. In district X the population with age ending 0 and 5 ending between age 23 and 62 years was 2513. The total population was 5265. Calculate the Whipples index
   a) 230
   b) 210
   c) 120
   d) 105
11. When constructing population pyramids male is usually in
   a) Right
   b) Left
   c) Horizontal
   d) Vertical
12. Which of the following is not a determinant of age structure?
   a) Migration
   b) Fertility
   c) Mortality
   d) Morbidity
13. Mortality levels, trends and prospects are presented through 3 indicators namely: Except.
   a) Maternal mortality
   b) Life expectancy at birth
   c) Infant Mortality Rate
   d) Mortality of children under 5 years.
14. Standard incidence Rate would refer to
   a) Morbidity data
   b) Morbid conditions
   c) Incidence rate
   d) Morbidity standard
15. .....is the ratio of the number of deaths observed in the study group /population to the number expected in the study population.
   a) Standardized mortality ratio
   b) Standardized Incidence Ratio
   c) Standard/Reference population
   d) Index population

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

16. .....is calculated as Males/Females (M/F) *100

a) Sex ratio
b) Dependency ratio
c) Age structure
d) Population projection

17. A population pyramid showing an unchanging pattern of fertility and mortality

a) Stable pyramid
b) Stationary pyramid
c) Constrictive pyramid
d) Expansive pyramid

18. Which two measures determine the extent of demographic transition

a) CBR and CDR
b) ASFR and GFR
c) BR and TFR
d) GFR and TFR

19. .....The number or the largest number of individuals that a given environment can support.

a) Carrying capacity
b) Population
c) Community
d) Resources

20. The population pyramid of a country has a broad base and tapering apex. Which of the following characterize population growth in this country?

a) Low fertility and low childhood mortality
b) Low fertility and high childhood mortality
c) High fertility and high childhood mortality
d) High fertility and low childhood mortality

21. Characteristics like age, marital status, education and gender are examples of .....

a) demographic information
b) psychographic information
c) firmographic information
d) customer intelligence

22. The following circumstances in the country or origin may lead people to emigrate: Push factors except

a) Economic opportunity
b) Poverty
c) War
d) Environmental disasters

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

23. The following are elements common to population policies except
    a) Rational
    b) Objectives and Goals
    c) Population growth
    d) Program Measures
24. Kenya growth rate in 1997 was 3.3%, present population in 1997 was 28million. When was the population of Kenya expected to double to 56million?
    a) 2018
    b) 2020
    c) 2019
    d) 2002
25. The overall sex ratio is entirely determined by the following expect
    a) The sex ratio at birth
    b) Sex differences in mortality
    c) Differential migration
    d) Fertility
26. Who predicted that population would increase by geometric progression, while food production would increase in arithmetic progression
    a) Tim cresswell
    b) John graunt
    c) Thomas Robert malthus
    d) Emile Durkheim
27. The Chinese State Council launched the policy of "one child" so the rate of population growth may be brought under control as soon as possible in the year
    a) 1989
    b) 1979
    c) 1967
    d) 2019
28. In 2009, the population of country X was 35 million. What was be the population of Country X in 2014 If the growth rate was 1.5%
    a) 37,704,940
    b) 367045800
    c) 234789000
    d) 289500000
29. ..... is the number of live births in an area during the year in mid-year population
    a) General fertility rate
    b) Crude birth rate
    c) Age specific fertility
    d) Child woman ratio
30. The age and sex structure of a population may be described by
    a) Population pyramid
    b) Life table
    c) Histogram
    d) Transition theory

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

31. In 1991, Population of Y was 31.5million and the deaths that occurred during the year were 83500 and 65900 births. What will be the crude death rate?
    a) 2.65 deaths /1000population
    b) 2 deaths/1000 population
    c) 3 deaths/1000 population
    d) 2.45 deaths / 1000 population
32. ……..is a set of techniques used to remove possible effects of differences in age or other confounding variables when comparing two or more population.
    a) Standardization
    b) Index population
    c) Whipples index
    d) Pre- testing
33. Population to be standardized is also known as……
    a) Index population
    b) Standard population
    c) Population with errors
    d) Reference population
34. …… is key summary tool for assessing and comparing mortality conditions prevailing in populations.
    a) Life table
    b) Whipples index
    c) Age heaping
    d) Standardization
35. …… is a special type of ratio in which the numerator is included in the denominator?
    a) Proportion
    b) Rate
    c) Ratio
    d) Percentage
36. ……is characteristics by a population has abundant space, food, and is protected from predators and disease, then organisms in that population multiplies and the population size increases.
    a) Exponential Growth-
    b) Logistic growth
    c) Growth rate
    d) Population increase
37. Demographic transition theory took place in ……. stages
    a) 4
    b) 5
    c) 2
    d) 6
38. …… is the death of a baby between 22 weeks of gestation (or weighing 500 g) and 7 days after birth?
    a) Perinatal death
    b) Neonatal death
    c) Infant death
    d) Still birth

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

39. In 2012, the government of Kenya passed a landmark policy to manage its rapid population growth. The new population policy aims to reduce the number of children a woman has over her lifetime from 5 to……..by 2030.
    a) 1
    b) 2
    c) 3
    d) 4
40. The formula for geometric growth model is

    a) Pt=P0(1+r)t
    b) Pt=P0(1+t)r
    c) Pt=Pr(1+t)r
    d) Pt=Pt(1+t)r

SECTION 2- SHORT ANSWER QUESTIONS (40 MARKS)

41. List and explain features of census data. (5 marks)
42. Briefly describe uses of basic demographic equation (5 marks)
43. Constant growth rate in a country may cause overpopulation. Explain the effect of overpopulation (10 marks)
44. Death is the vital event for which statistics are collected by the vital statistics registration system. Outline the uses of mortality data (5 marks)
45. In life table *x* denote age of person and *lx* Number of person living at age x. Given the data below calculate: (5 marks)
    a) dx
    b) qx
    c) px
    d) Lx

x	lx	dx=	qx=	Px	Lx
0	20	a)…..	b)……	c)…….	d)……..
1	19				
2	15				
3	5				

46. Explain the different between age heaping and age shifting. (5 marks)
47. List and explain five main sources of demographic data. (5 marks)

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

SECTION 3- LONG ANSWER QUESTION (20 MARKS)

48. In a town with a population of 110,000 there were 6,500 live births and 230 infant deaths in the year 2000. Of these 76 infants died in the first 28 days of life and 42 of them died in the first week of life. There were 110 still births in the same year.

    Calculate

    a) Infant mortality rate (5 marks)
    b) Prenatal mortality rate (5 marks)
    c) Neonatal mortality (5 marks)
    d) Post neonatal mortality rate (5 marks)

EPIDEMIOLOGY

SECTION 1- MULTIPLE CHOICE QUESTIONS (40 MARKS)

1. Which of the following is not a type of analytic studies?
   a) Cross sectional surveys
   b) Observational studies
   c) Case control studies
   d) Cohort studies

2. --- studies looks forward from an exposure to outcome
   a) Retrospective studies
   b) Cohort studies
   c) Case control studies
   d) Prospective studies

3. ---- incidence provides an estimate of the probability that an individual will develop a disease during a specific period of time
   a) Gross
   b) Net
   c) Density
   d) Cumulative

4. Unusual medical occurrences that can represent the first clues in the identification of new diseases or adverse effects of exposure are documented inform of
   a) Case manuals
   b) Case report
   c) Case series
   d) Case data

5. ---- refers to the application of a test to people who are yet asymptomatic for the purpose of classifying them with respect to their likelihood of getting a certain disease
   a. Testing
   b. Diagnosis
   c. Screening
   d. Validation

6. Which type of trials involves evaluation of whether an agent or procedure reduces the risk of developing a disease
   a) Therapeutic
   b) Preventive
   c) Control
   d) Secondary

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

7. What is the type of prevention that aims at reducing the impact of a disease?
   a) Primary
   b) Secondary
   c) Tertiary
   d) Middle

8. An individual who harbors the disease organism but is not infected is referred to as
   a) Asymptomatic
   b) Symptomatic
   c) Latent
   d) Carrier

9. --- is the ability of the test to identify correctly those who have a disease
   a) Validity
   b) Reliability
   c) Sensitivity
   d) Specificity

10. Another name for reliability of a test is
    a) Sensitivity
    b) Variation
    c) Correctness
    d) Repeatability

11. Which one of the following is a good index of the severity of a short term acute disease?
    a. Cause of specific disease
    b. 5-year survival
    c. Case fatality
    d. Standardized mortality ratio

12. Randomization can be achieved by use of one of the following except
    a) Epidemiology tables
    b) Computers
    c) Random number tables
    d) Random numbers

13. The major purpose of random assignment in clinical trials is to
    a) Facilitate double blinding
    b) Reduce selection bias in the allocation of treatment
    c) Facilitate the measurement of outcome variables
    d) Help ensure that the study subjects are representative of the general population

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

14. Another name for odd ratio is
    a) Against Odds
    b) Odds Risk
    c) Relative Odds
    d) Risk Odds

15. ------ is the amount or proportion of disease incidence that can be attributed to a specific exposure
    a) Attributable odds
    b) Attributable risk
    c) Attributable Risk Percent
    d) Attributable Risk

16. All the following are important criterial when making casual inferences except
    a) Constancy with existing knowledge
    b) Prediction of events
    c) Strength of association
    d) Dose response relationship

17. ---- is a systematic relationship error in design conduct or analysis of a study that results in a mistaken estimate of an exposure effect
    a) Interaction
    b) Inference
    c) Bias
    d) Confounder

18. The extent to which a specific health care treatment, service or procedure, program or other intervention produces a beneficial result under ideal control is called
    a) Efficacy
    b) Effectiveness
    c) Effect modification
    d) Efficiency

19. Which one of the following is termed as a fictitious rate?
    a) A prevalence rate
    b) Incidence rate
    c) Standardize rate
    d) Infant mortality rate

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

20. ------ is a means by which a causal factor leads to an outcome
    a) Intervening variable
    b) Validity
    c) Modifier
    d) Confounder

21. Which of the following is a measure of risk of having a risk factor?
    a) Kappa
    b) Odds ratio
    c) Relative risk
    d) Risk ratio

22. The administration of human immune globulin after exposure of Hepatitis B is an example of
    a) Herd immunity
    b) Acute immunity
    c) Passive immunity
    d) Acquired immunity

23. Which one of the following is an example of tertiary prevention?
    a) Hospice care
    b) Occupational therapy following a stroke
    c) Post exposure prophylaxis for rabies
    d) Treatment of essential hypertension

24. ----- Measure the part of population that is affected by disease or other health related event compared to the total population
    a) Counts
    b) Rate
    c) Proportion
    d) Ratio

25. Period prevalence is obtained from one of the following studies
    a) Longitudinal studies
    b) Cross-sectional studies
    c) Case control studies
    d) Cohort studies

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

26. ------ refers to the proportion of persons with clinical diseases who become severely ill or die.
    a) Infertility
    b) Pathogenicity
    c) Incubation
    d) Virulence

27. In order for a disease agent to survive, it should be able to do the following except
    a) Emerge from a new host
    b) Change its mode of transmission
    c) Multiply
    d) Infect a new host

28. Disease carriers can be classified into the following except
    a) Convalescent carrier
    b) Acute carriers
    c) Asymptomatic carries
    d) Chronic carries

29. Which one of the following is not a notifiable disease?
    a) Polio
    b) Yellow fever
    c) Cholera
    d) Dysentery

30. The following are disease related considerations during screening except
    a) The natural history of a disease should be well known
    b) Test should be safe, reliable and valid
    c) Disease is an important serious problem in the population
    d) A standard confirmatory test for the dieses is available

31. The following are the sources of variability that affect the reliability of results of a screening test except
    a) Intro-observer variation
    b) Situational conditions
    c) Biological variations
    d) Inter-observer variation

32. Another name for relative risk is
    a) Odds ratio
    b) Relative odds
    c) Risk ratio
    d) Risk rate

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

33. Relative risk greater than one denotes
    a) Evidence of positive association
    b) Evidence of negative association
    c) Evidence of No association
    d) Evidence of equal association

34. Which one of the following is not a type of a common source epidemic?
    a) Multiple
    b) Breaking
    c) Single
    d) Continuous

35. The following are components of primary prevention except one, which one?
    a) Health promotion
    b) Prevention of disease
    c) Slowing of progression of disease
    d) Prevention of exposure

36. Which one of the following is not a type of direct transmission?
    a) Direct contact
    b) Direct projection
    c) Trans placental
    d) Droplet nuclei

37. ----- vector does not have to go through a period of multiplication or development in the Vector
    a) Residual
    b) Biological
    c) Mechanical
    d) Airborne

38. Which type of mortality rate reflects the risk of death in community or country
    a) Crude death rate
    b) Infant mortality rate
    c) Sex specific mortality rate
    d) Case fatality rate

39. --- are epidemic of shorter duration covering a more limited area
    a) Hyperendemic
    b) Out break
    c) Holo endermic
    d) Sporadic

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

40. Which one of the following is not a measure directed when human is the reservoir?
    a) Quarantine
    b) Destruction
    c) Isolation
    d) Treatment

SECTION 2: SHORT ANSWER QUESTIONS (40 MARKS)

41. List and explain five advantages of passive surveillance. (5 marks)
42. State and explain three types of cases in the case definition of COVID-19. (5 marks)
43. Briefly explain the concept of confounding. (5 marks)
44. Explain the concept of herd immunity. (5 marks)
45. An arear Y has a population of 100,000. 20 persons become sick of malaria in a year. 18 of the 20 persons die from malaria (5 marks)
    i. Calculate the mortality rate from malaria
    ii. Calculate the case fatality rate from malaria
46. List and explain five guidelines for judging whether an observed association is causal. (5 marks)
47. List and explain five different types of epidemiology. (5 marks)
48. Write short notes on incidence density. (5 marks)

SECTION 3: LONG ANSWER QUESTION (20 MARKS)

49. Using a well labeled diagram, explain cohort studies with use of coronary heart disease and smoking as an example. (10 marks)

50. The following table presents the results of a screening test

Results of screening	Disease	No disease	Total
Positive	80a	100b	180
Negative	20c	800d	820
Total	100	900	1000

Calculate

i. Sensitivity
ii. Specificity
iii. Positive predictive value
iv. Negative predictive value

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

DATABASE MANAGEMENT THEORY ANSWER ALL QUESTIONS 30MARKS

1. The process of finding errors and fixing them within a program is called?
   a. Compiling
   b. Debugging
   c. Scanning
   d. Executing
2. Which tool do you use to create a query object?
   a. Simple query wizard
   b. Database wizard
   c. Table query wizard
   d. Simple filer wizard
3. Which of the following is the ascending order of data hierarchy?
   a. Byte-Bit-Field-Record-File-Database
   b. Bit-Byte-Field-Record-Database-File
   c. Bit-Byte-Field-Record-File-Database
   d. Bit-Byte-Record-Field-File-Database
4. Database access levels are specified so as to define who can access what in a database. It is identified through?
   a. Password
   b. Lock settings
   c. Status
   d. User ID
5. A search value can be exact valve or it can be?
   a. Wild card character
   b. Relationships
   c. Logical operator
   d. Comparison operation
6. In which method we don't need to specify the field type and size while creating a new table?
   a. Design view
   b. Data sheet view
   c. Create table by entering data
   d. While using wizard
7. The size of Yes/No field is always?
   a. I character
   b. I bit
   c. I byte
   d. I kB

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

8. Which kind of query that displays its own dialog box prompting you for entering information before executing.
   a. Dialog query
   b. Parameter query
   c. Crosstab query
   d. Select query
9. Which field type can store photos?
   a. Photo link
   b. Expression builder
   c. Hyper link
   d. OLE object
10. If a create **'Student'** field' in **'Fees'** table to store **'Student_id'** of **'Student'** table, then this **'Student'** field in **'Fees'** table is called?
   a. Native key
   b. Foreign key
   c. Composite key
   d. Primary key
11. The complete information about an entity in a database is called?
   a. Record
   b. Field
   c. Data
   d. Information
12. The input mask wizard does not include the ability to do which of the following?
   a. Store symbols with data
   b. Use preset masks
   c. Define placeholder
   d. Force all uppercase
13. This data type allows alphanumeric characters and special symbols?
   a. Currency
   b. Memo
   c. Auto number
   d. Text
14. Query design has two parts. The upper part shows?
   a. Name of fields, field types and size
   b. Sorting check boxes
   c. Tables with fields and relationships between tables
   d. Reports and macros to query
15. Any report, including basic report can be modified in?
   a. Layout view
   b. Table view
   c. Report view
   d. Print view

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

16. Using the keyboard_____ will return a record in which the field value equals a defined text.
    a. Like
    b. Between
    c. Is null
    d. Equal
17. In Ms Access **'lookup wizard'** is use to?
    a. Select value from excel sheets
    b. Select value from another table
    c. Identify tables to be selected
    d. Select from preview values
18. The basic elements of a form or a report are called?
    a. Table
    b. Windows
    c. Objects
    d. Controls
19. In Ms PowerPoint, which of the following is not a part of slide design?
    a. Design template
    b. Design view
    c. Slide layout
    d. Colour scheme
20. What lets you create new presentation by selecting ready-made fort colour and graphic effects?
    a. Animation scheme
    b. Design template
    c. Presentation template
    d. Fort scheme
21. Which of the following is not one of PowerPoint views?
    a. Presentation view
    b. Slide show view
    c. Slide views
    d. Transition view
22. A function inside another function is called?
    a. Duplicate function
    b. Nested function
    c. Round function
    d. Inner function
23. Which function will you use to enter **current time** in a worksheet cell?
    a. = Current Time ( )
    b. = time ( )
    c. = now ( )
    d. = today ( )
