FOREWORD

The Government of Kenya is committed to ensuring that policy objectives for education, training and research meet the aspirations of the Kenya Constitution, 2010 and the Kenya Vision 2030. In relation to this, the Ministry of Education (MoE) seeks to ensure that policy documents developed are consistent with the international education commitments and other conventions to which Kenya is a signatory. The Competency Based Curriculum (CBC) at Junior and Senior Secondary level calls for development of transformative and reflective teachers who can identify and utilise existing opportunities to implement curricula in different learning contexts. This, in turn, has implications on Pre-service Secondary Teacher Education (PSTE).

To respond to this challenge, the Ministry of Education has developed the Diploma in Secondary Teacher Education curriculum designs to enable the student teachers achieve higher levels of professional and practical competencies required to implement the reformed curriculum at the Junior and Senior Secondary school level. The MoE appreciates that the Diploma in Secondary Teacher Education (DSTE) course has been developed with insights from research findings, particularly the Needs Assessment for Teacher Education, international benchmarking and sufficient stakeholder engagement. These insights have resulted in the conceptualization and design of a Pre-service Secondary Teacher Education (PSTE) programme which aims to *produce a competent teacher committed to nurturing every learner's potential for sustainable development*.

The curriculum designs have been developed through a consultative process that involved all relevant stakeholders: Curriculum Developers from the Kenya Institute of Curriculum Development (KICD), University Lecturers, tutors from Diploma Teacher Training Colleges (DTTCs), officers from the Kenya National Examinations Council (KNEC), Teachers Service Commission (TSC), Directorate of Teacher Education (MoE) and the Directorate of Quality Assurance and Standards at MoE among others. It is important to note that the curriculum designs provide a link between the National Goals of Education, the Level Learning Outcomes for DSTE, subject general learning outcomes and the specific learning outcomes for each learning area. There are also a variety of suggested learning experiences, assessment and resources amongst other critical components. Implementers of the DSTE course will need to ensure that this link is upheld consistently to fulfil the vision of producing a professional, reflective and ethical teacher.

It is my expectation that the DSTE curriculum designs will serve as valuable reference materials to teacher educators and guide in effective implementation of the Pre-service Secondary Teacher Education (PSTE) Course.

PROF. GEORGE A. O. MAGOHA, EGH
CABINET SECRETARY
MINISTRY OF EDUCATION

PREFACE

The Sessional Paper No. I of 2019, *Towards Realizing Quality, Relevant and Inclusive Education and Training for Sustainable Development,* is the policy framework for the Education Sector that seeks to actualise the tenets of the Kenya Vision 2030. The social strategy for achieving Vision 2030 reiterates the need to invest in the people of Kenya, and prioritizes modernisation of teacher training as a key component. The Ministry of Education (MoE) recognises that ensuring a vital human resource for quality teaching is the foundation of any successful education system. The Sessional Paper explains the shift from a Content - Focused Curriculum for Basic Education to a Competency Based Curriculum (CBC). This has necessitated the change in the Teacher Education Curriculum to align it with the aspirations of the nation.

To enable teachers to effectively fulfil their expected leading roles in curriculum implementation, there is need for adequate preparation during pre-service training in professionalism, content, pedagogy and desirable values. Consistent with the CBC, the KICD has developed a Teacher Education Curriculum Framework (TECF) which emphasises the need to adopt a Competency Based Teacher Education (CBTE). Consequently, the curriculum designs for the Diploma in Secondary Teacher Education (DSTE) have provided for professional and common courses to enable the trainees acquire the pre-requisite competences to effectively discharge their duty as teachers. This will enable them to support learners in Junior and Senior Secondary to develop the competencies necessary to realise the vision and mission of the CBC as captured in the Basic Education Curriculum Framework (KICD, 2017).

Micro Teaching and Practicum have been given prominence in order to enhance experiential learning with support from experienced teachers as mentors. Therefore, MoE is convinced that the DSTE curriculum designs will facilitate production of competent teachers thus help Kenya become a middle-income industrialized nation as per the key tenets of the Constitution 2010, the National Goals of Education and the Kenya Vision 2030.

It is my hope that the Teacher Training Colleges will adhere to the guidelines in the designs to ensure efficiency and consistency in the implementation of the Pre-service Secondary Teacher Education Course in Kenya.

DR. JULIUS O. JWAN, MBS
PRINCIPAL SECRETARY
STATE DEPARTMENT OF EARLY LEARNING AND BASIC EDUCATION
MINISTRY OF EDUCATION

ACKNOWLEDGEMENT

The Kenya Institute of Curriculum Development (KICD) Act Number 4 of 2013 (Revised 2018) mandates the Institute to develop curricula and curriculum support materials for basic and tertiary education except the university. The curriculum development process for any level involves thorough research, international benchmarking and robust stakeholder engagement.

Through this systematic and consultative process, the KICD conceptualised the Competency Based Curriculum (CBC) as captured in the Basic Education Curriculum Framework (BECF), that responds to the demands of the 21st Century and the aspirations captured in the Kenya Constitution 2010, and the Kenya Vision 2030, East African Commission Protocol and the United Nations Sustainable Development Goals. Accordingly, the development of the Curriculum Designs for the Diploma in Secondary Teacher Education (DSTE) takes cognisance of the tenets of CBTE, key among them being the need to ensure student teachers get opportunities to comprehensively engage with the learners' content, the interactive pedagogies and socially acceptable values that would nurture every learner's potential. Therefore, a key feature of the curriculum design for each subject is the integration of content with pedagogy and provisions for experiential learning through sufficient time for Micro – Teaching and the Practicum.

I wish to acknowledge the KICD curriculum developers and other staff, all teachers and educators who took part as panelists, the Semi-Autonomous Government Agencies (SAGAs) and representatives of various stakeholders for their various roles in the development of the Teacher Education curriculum designs.

I give special thanks to the Cabinet Secretary – Ministry of Education, the Principal Secretary – State Department of Early Learning and Basic Education, the Secretary Teachers Service Commission (TSC) and the Chief Executive Officer of the Kenya National Examinations Council (KNEC) for their support in the process.

Finally, I am very grateful to the KICD Council for very consistent guidance in the process. I assure all student teachers, teacher educators and other stakeholders that these Curriculum Designs will effectively guide the implementation of the DSTE and lead to the graduation of competent teachers who shall successfully implement the CBC in Kenya and internationally.

PROF. CHARLES O. ONG'ONDO, MBS
DIRECTOR/CHIEF EXECUTIVE OFFICER

INTRODUCTION

The development of the curriculum for Diploma in Secondary Teacher Education (DSTE) is a critical milestone in the implementation of Competency Based Curriculum (CBC) in Kenya. The curriculum designs have been developed to prepare the student teacher to be able to effectively guide the learners at the Secondary level of Basic Education.

It is envisaged that the teacher educator will guide the teacher trainee appropriately to embrace the shift from the Objective-Based to the Competency Based Curriculum which is hinged on use of learner-centred methodologies for realisation of the expected outcomes. In addition, the emphasis on formative assessment to facilitate learning should be underscored as the basis for determining learner aptitude and performance. Other key aspects that have been introduced include structured micro-teaching, a longer period for the practicum and the introduction of specific Professional learning areas that ensure congruence with the CBC's vision, mission, pillars and guiding principles as enshrined in the *Basic Education Curriculum Framework* (KICD, 2017).

The DSTE curriculum seeks to mould a teacher who become a facilitator in the learning process taking into consideration the different abilities and learning styles of individual target learners. The curriculum has been designed with emphasis on experiential and reflective learning to develop appropriate pedagogical content knowledge; hence the emphasis on integrated content and pedagogy for the student teachers while undergoing training. This is to ensure that the teacher trainee is given adequate time to practice how to facilitate learning of the different strands prescribed in the curriculum designs.

The Curriculum Designs for the Diploma in Secondary Teacher Education (DSTE) are packaged according to subjects or learning areas of training as follows:

REGULATIONS FOR THE DIPLOMA IN SECONDARY TEACHER EDUCATION (DSTE)

ENTRY REQUIREMENTS

The entry requirements for the Diploma in Secondary Teacher Education (DSTE) shall be a Mean Grade of **C+ (Plus)** in the Kenya Certificate of Secondary Education examination (KCSE) or its equivalent as equated by the Kenya National Examinations Council (KNEC). The Candidates with Special Needs could be admitted with **C (Plain)** and **C (Plus)** in the two teaching subjects, **C- (Minus)** in English, **C- (Minus)** in mathematics for science based combinations **D+ (Plus)** in mathematics for non-science-based ones in KCSE or its equivalent for the respective Diplomas.

DURATION OF TRAINING

The duration for the Diploma in Secondary Teacher Education (DSTE) shall be **2940 Hours for THREE years**.

SUBJECTS OFFERED

The trainee undertaking the Diploma in Secondary Teacher Education (DSTE) shall take **TWO core teaching subjects and a COMMON subject. Life Skills Education (LSE) and Physical Education are COMPULSORY subjects, the core teaching subjects shall PREFERABLY be drawn from those taught at senior school. ALL** teacher trainees shall also take 12 Professional learning areas/ subjects.

MICRO-TEACHING AND PRACTICUM

Micro Teaching shall be undertaken as a learning area set to prepare teacher trainee for pedagogical content knowledge which they are expected to learn from term 1 of their training. It is also a pre-requisite for the micro teaching in term seven and subsequent Practicum. A design for it has therefore been developed. There shall be two (2) school term practicum sessions for which guidelines shall be developed.

DRAFT

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

AWARD OF DIPLOMA

To be awarded the Diploma in Secondary Teacher Education, the candidate must achieve the following:

i) Complete the required hours for coursework and pass the stipulated assessment as directed by the Kenya National Examinations Council (KNEC).
ii) Complete the required hours for the Practicum and pass the stipulated assessment as directed by the Kenya National Examinations Council (KNEC).

Note: If the student fails to meet the requirements for award of the Diploma in Secondary Teacher Education he/she will be allowed to repeat the specific component or learning area in which they did not perform well.

GRADING

The Diploma in Secondary Teacher Education (DSTE) shall be graded as stipulated by the Kenya National Examinations Council (KNEC).

NATIONAL GOALS OF EDUCATION

Education in Kenya should:

i) **Foster nationalism and patriotism and promote national unity.**

Kenya's people belong to different communities, races and religions, but these differences need not divide them. They must be able to live and interact as Kenyans. It is a paramount duty of education to help young people acquire this sense of nationhood by removing conflicts and promoting positive attitudes of mutual respect which enable them to live together in harmony and foster patriotism in order to make a positive contribution to the life of the nation.

ii) **Promote the social, economic, technological and industrial needs for national development.**

Education should prepare the youth of the country to play an effective and productive role in the life of the nation.

a) **Social Needs**

Education in Kenya must prepare children for changes in attitudes and relationships which are necessary for the smooth progress of a rapidly developing modern economy. There is bound to be a silent social revolution following in the wake of rapid modernization. Education should assist our youth to adapt to this change.

b) **Economic Needs**

Education in Kenya should produce citizens with the skills, knowledge, expertise and personal qualities that are required to support a growing economy. Kenya is building up a modern and independent economy which is in need of an adequate and relevant domestic workforce.

c) **Technological and Industrial Needs**

Education in Kenya should provide learners with the necessary skills and attitudes for industrial development. Kenya recognizes the rapid industrial and technological changes taking place, especially in the developed world. We can only be part of this development if our education system is deliberately focused on the knowledge, skills and attitudes that will prepare our young people for these changing global trends.

DRAFT

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

iii) **Promote individual development and self-fulfilment**

Education should provide opportunities for the fullest development of individual talents and personality. It should help children to develop their potential interests and abilities. A vital aspect of individual development is the building of character.

iv) **Promote sound moral and religious values.**

Education should provide for the development of knowledge, skills and attitudes that will enhance the acquisition of sound moral values and help children to grow up into self-disciplined, self-reliant and integrated citizens.

v) **Promote social equality and responsibility.**

Education should promote social equality and foster a sense of social responsibility within an education system which provides equal educational opportunities for all. It should give all children varied and challenging opportunities for collective activities and corporate social service irrespective of gender, ability or geographical environment.

vi) **Promote respect for and development of Kenya's rich and varied cultures.**

Education should instil in the youth of Kenya an understanding of past and present cultures and their valid place in contemporary society. Children should be able to blend the best of traditional values with the changing requirements that must follow rapid development in order to build a stable and modern society.

vii) **Promote international consciousness and foster positive attitudes towards other nations.**

Kenya is part of the international community. It is part of the complicated and interdependent network of peoples and nations. Education should therefore lead the youth of the country to accept membership of this international community with all the obligations and responsibilities, rights and benefits that this membership entails.

DRAFT

This document is available on studocu

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

viii) **Promote positive attitudes towards good health and environmental protection.**

Education should inculcate in young people the value of good health in order for them to avoid indulging in activities that will lead to physical or mental ill health. It should foster positive attitudes towards environmental development and conservation. It should lead the youth of Kenya to appreciate the need for a healthy environment.

DRAFT

LEVEL LEARNING OUTCOMES

By the end of the Course the Teacher Trainee should be able to:

1. Use knowledge, skills and attitudes acquired to promote acquisition of competencies in various subject areas for effective curriculum delivery.
2. Model appropriate behaviour and values for secondary school learners to emulate for development of good citizenship
3. Communicate and collaborate effectively with learners, peers, parents and the community to create a conducive learning environment.
4. Use appropriate pedagogical approaches to facilitate learning for secondary school learners in and out of the classroom
5. Apply inclusive practices to support all secondary school learners including those with disabilities and special educational needs
6. Employ ICT skills in the learning process to enhance digital literacy
7. Employ appropriate assessment approaches to promote effective learning
8. Nurture learner's potential and talents for appropriate placement and transition for further education and into the world of work.
9. Develop environmental conservation skills in secondary school learners to promote education for sustainable development
10. Create/Develop innovative and effective solutions to identified challenges in the teaching and learning process
11. Integrate pertinent and contemporary issues in learning to enable learners cope with challenges in day-to-day life.

ESSENCE STATEMENT

Sociological and philosophical foundations of education is a subject in the Diploma in Secondary Teacher Education (DSTE) course that focuses on individual experiences and institutional practices that affect education and its outcomes. It explores the relevance of educational content and learning experiences. The subject provides knowledge on the relevance of sociology and philosophy to a teacher, sociological theories and their application to learning, Agents of socialization and their role in education, philosophical schools of thought and frameworks that are used to inform practices in education and socio-economic and environmental issues in education. It is concerned with the appropriate criteria for evaluating both the educational practices and educational outcomes. In addition, the subject content addresses the authority of the state, the role of the teacher, the rights of learners, the responsibility of parents and the character of the education system. It prepares the teacher trainee to critically analyse and make informed judgments on the content, purpose and aims of education so as to understand and participate effectively in the education process. It enables the teacher trainee to appreciate education and schooling in providing competencies for proper adjustment in both the learning environment and the larger society. It enhances a teacher trainee's understanding of the school community as part of the society, as well as addressing social challenges that may hinder learning. The learning area allows the teacher trainee to reflect on key issues of what and how learners learn. It exposes the teacher trainee to learning through real life experiences and interaction with social environment. Content will be delivered through experiential learning approaches that include, discussions, research projects, inquiry-based learning and case studies.

DRAFT

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

GENERAL LEARNING OUTCOMES

By the end of the course, the teacher trainee should be able to:-

1. Apply acquired knowledge, skills, values and attitudes from sociological theories in education to enhance effective learning.
2. Adhere to legal provisions on the rights of the learner in education to promote their care, safety and security in and out of school for effective learning.
3. Model and nurture instructional, technological and social skills, attitudes and values to respond effectively to socio-economic and environmental challenges affecting education.
4. Collaborate with agents of socialization in education to support their role in promoting values and communal responsibility among learners.
5. Employ relevant pedagogical skills gained from philosophical schools of thought in facilitating learning.
6. Apply acquired knowledge, skills, values and attitudes from philosophical foundations in education to enhance effective learning.

STRAND 1.0 OVERVIEW OF SOCIOLOGY OF EDUCATION

Year	Strand	Sub Strand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Questions
1	**1.0 OVERVIEW OF SOCIOLOGY OF EDUCATION**	**1.1. Concepts in Sociology of Education**	By the end of sub strand the teacher trainee should be able to: a) evaluate sociological concepts in a learning situation, b) Examine the aims and functions of Sociology of education, c) acknowledge the importance of sociology of education to a teacher.	Teacher trainee to: • brainstorm on the meaning of Sociology of Education, • read on the aims and functions of Sociology of education, write a report and make presentations, • discuss the sociological definitions of education, • debate on the importance of Sociology of Education to a teacher and the learning process.	How does the study of Sociology of Education benefit a secondary school teacher?
	Core Competencies to be developed: • **Communication and collaboration:** Enhances their skills in communication, team building and problem solving as the teacher trainee participates in discussions on the sociological definitions of education.				

DRAFT

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

	Values: **Respect** is enhanced as the teacher trainee accommodates others' opinions as they debate the importance of Sociology of Education to a teacher and the learning process.
	Pertinent and Contemporary Issues (PCIs): **Analytical thinking is** promoted as the teacher trainee debates the importance of Sociology of Education to a teacher and the learning process.

Suggested Formative Assessment Rubrics				
Level / Indicator	**Exceeds Expectations**	**Meets Expectations**	**Approaches Expectations**	**Below Expectations**
Ability to evaluate sociological concepts in a learning situation.	Evaluates sociological concepts in a learning situation providing relevant examples.	Evaluates sociological concepts in a learning situation.	Evaluates some sociological concepts in a learning situation.	Evaluates some sociological concepts in a learning situation with guidance.
Ability to examine the aims and functions of Sociology of education	Elaborately examines the aims and functions of Sociology of education	Examines the aims and functions of Sociology of education	Partially examines the aims and functions of Sociology of education	Narrowly examines the aims and functions of Sociology of education

Year	Strand	Sub Strand	Specific Learning Outcomes	Suggested Learning Experiences	Key Inquiry Question(s)
1	**1.0 OVERVIEW OF SOCIOLOGY OF EDUCATION**	**1.2 Education as a Process and as a System**	By the end of sub strand the teacher trainee should be able to: a) distinguish education as a process in school, b) analyse the concept of education as a system in Kenya, c) acknowledge the importance of education as a process and as a system in learning.	Teacher trainee to: • search for information from the internet and other sources on the concept of education as a process and as a system, • debate on the differences between education as a process and as a system, • discuss the education system in Kenya and make a critical judgement on the school as a social organization. make reports and share findings, • write and present a paper on education as a process of socialization and enculturation.	Why is education a process and a system?
	Core Competencies to be developed: • **Critical thinking and problem solving**: Uses logic and evidence to arrive at solutions as the teacher trainee debates on the differences between education as a process and as a system. • **Self-efficacy:** Reflects confidence in the ability to exert control over their social environment as the teacher trainee writes and presents a paper on education as a process of socialization and enculturation.				

DRAFT

Downloaded by Patrick Ngobiro (pngobiro@gmail.com)

	Values: **Unity** is enhanced as the teacher trainee discusses with peers on education as a system in Kenya.
	Pertinent and Contemporary Issues (PCIs): • **Use of information technology** enhanced as teacher trainee searches for information from the internet and other sources on the concept of education as a process and as a system • **Self-esteem and coping with emotion** developed as the teacher trainees debate on the differences between education as a process and as a system

Suggested Formative Assessment Rubrics				
Level / Indicator	**Exceeds Expectations**	**Meets Expectations**	**Approaches Expectations**	**Below Expectations**
Ability to distinguish education as a process.	Distinguishes education as a process with a high degree of clarity.	Distinguishes education as a process with clarity.	Distinguishes education as a process with some degree of clarity.	Vaguely distinguishes education as a process.
Ability to analyse the concept of education as a system in Kenya.	Critically analyses the concept of education as a system in Kenya.	Analyses the concept of education as a system in Kenya.	Partially analyses the concept of education as a system in Kenya.	Analyses the concept of education as a system in Kenya with guidance.
